

**BANDO DEL PROGRAMMA NEUROSCIENZE  
ELENCO PROGETTI FINANZIATI UNICENTRICI  
IN ORDINE ALFABETICO  
SECONDA SCADENZA 31 OTTOBRE 2008**

<b>Ente</b>	<b>Progetto</b>	<b>Finanziamento in €</b>
ASL TO1 - Ospedale Martini - Torino	Sleep organization in ADHD patients before and after treatment with Atomoxetine and Methylphenidate	110.000
CNR - Genova	States and kinetics of oligomerization and fibrillization of beta-amyloids in Alzheimer Disease	120.000
Consorzio Interuniversitario di Ricerca In Chimica dei Metalli nei Sistemi Biologici - CIRCMSB - Bari	Protein Oligomers: Role In Neurodegeneration	150.000
Fondazione EBRI "Rita Levi Montalcini" - Roma	MicroRNAs In Neurodegenerative Diseases	120.000
Istituto di Ricerche Farmacologiche Mario Negri - Milano	JNK, a key player in AD pathogenesis: towards innovative therapy	110.000
Istituto Italiano di Tecnologia - Genova	New players in visual cortical plasticity in vivo: role of interneurons and astrocytes	120.000
Istituto Italiano di Tecnologia - Genova	Fat times for neuronal plasticity: Mechanism and significance of extracellular-signal regulated protein palmitoylation	120.000
Istituto Nazionale per la Ricerca sul Cancro - Genova	Molecular and cellular basis of glioma: Identification of diagnostic markers and therapeutic targets in glioma stem cells	130.000
Istituto Scientifico San Raffaele - Milano	Axo-Glial interactions and regulation of myelination	180.000
Scuola Internazionale Superiore di Studi Avanzati - SISSA - Trieste	Tactile Intracortical Processing - Object from Feature Fracturing	110.000
Seconda Università di Napoli	Reward system and primary negative symptoms in schizophrenia	90.000
Seconda Università di Napoli	Perception of body shape and weight in eating disorders: a functional imaging study	130.000
Università dell'Aquila	The Effects of Spatial Learning on Human Hippocampal Stereo-Electroencephalographic Sleep	50.000
Università di Firenze	Brain histamine in the neurobiology of fear: new molecular targets for the treatment of post-traumatic stress syndrome (PTSD)	130.000
Università di Firenze	Study of mechanisms of serotonergic cell autoinhibition in raphe nuclei and their relevance to physiology and pathology	130.000
Università di Firenze	Metabotropic glutamate receptors and endocannabinoids: functional interactions and physiopathological role in cerebral ischemia	105.000
Università di Genova	Ebf2 role in peripheral nervous system development and myelination	80.000
Università di Genova	Functional role of hyccin, a membrane protein mutated in HCC, a novel disorder of myelination	110.000
Università di Napoli "Federico II"	Origin of presynaptic RNA from perisynaptic glial cells	100.000
Università di Napoli "Federico II"	Inflammation and neurodegeneration: identification of the acute phase protein haptoglobin as a potential modulator of apolipoprotein E-mediated regulation of brain cholesterol and B-amyloid homeostasis	130.000
Università di Padova	Modulation of attention and spatial awareness by concurrent task demands: Implication for right hemisphere stroke patients	65.000
Università di Perugia	Influence of neuronal and gonadal estrogens on synaptic transmission and plasticity in the vestibular system	50.000

<b>Ente</b>	<b>Progetto</b>	<b>Finanziamento in €</b>
Università di Pisa	Cognitive-behavioural and acceptance-based strategies for preventing depression in patients with cancer	140.000
Università di Torino	Glial plasticity in reactive gliosis: novel approaches to promote brain repair	80.000
Università di Torino	Experience-dependent modulation of adult neurogenesis in the accessory olfactory bulb of mice	70.000
Università di Trento	The Neuropsychology of Binding	100.000
Università di Trieste	Understanding eye movement generation through remote distraction	55.000
Università di Verona	Enhancing motor performance by action observation. Neurophysiological mechanism and implications for patients with motor deficits	58.000
Università di Verona	Novel roles for immune molecule signaling in brain networks	115.000
Università La Sapienza - Roma	Temporally-defined crossmodal interactions in time and space: Overcoming the deficit in visual awareness in the neglect syndrome	100.000
Università La Sapienza - Roma	Trafficking of the neuroligins: the influence of mutations associated with autism in relation to biosynthetic processing	100.000
Università Suor Orsola Benincasa - Napoli	Exploring an attraction account of Closing-In Behaviour	54.000
Università Tor Vergata - Roma	Molecular correlations between Alzheimer Disease and Fragile X Syndrome: insights into neuronal development, mental retardation and neurodegeneration	140.000
