## Annual Report 2021

Letter from the Chair 9

### Part 1 2021. Overview

1.1	How to read the data	11
1.2	Grants	11
1.3	Scale of interventions	14
1.4	Applications approved and rejected	15
1.5	Type of interventions	16
1.6	Recipients of resources by legal form	17
1.7	Geographical distribution of funding	18
1.8	Calls for proposals issued by Compagnia di San Paolo in 2021	20

### Part 2 The Multi-Year Planning Document 2021-24. The launch of monitoring

2.1	The launch of monitoring of the Multi-Year Planning Document 2021-24	23
2.2	The contribution of 2021 grant-making activities to achieving Sustainable Development Goals	24
2.3	The launch of monitoring of the strategic plan	25
2.4	Cross-cutting dimensions	27

### Part 3 Fondazione Compagnia di San Paolo Goals and Missions: operational and grant-making activity 2021

#### Culture Goal

1	“Building Capacity to Attract” Mission	32
2	“Developing Skills” Mission	33
3	“Preserving Beauty” Mission	34
4	“Encouraging Active Participation” Mission	35

#### People Goal

5	“Reinventing Dwelling Systems and Regenerating Neighbourhoods” Mission	39
6	“Promoting Decent Work” Mission	41
7	“Educating for Collective Development” Mission	43
8	“Rediscovering Community” Mission	44
9	“Working Together for Inclusion” Mission	46

#### Planet Goal

10	“Harnessing the Value of Research” Mission	50
11	“Boosting Innovation” Mission	52
12	“Promoting Well-being” Mission	55
13	“Fostering International Opportunities” Mission	56
14	“Protecting the Environment” Mission	57

### Part 4 The cross-cutting functions. Highlights of 2021

4.1	High-Impact Innovation Department	60
4.2	Planning, Research and Evaluation Department	62
4.3	Operations Department	63
4.4	Communication	63
4.5	PHaaS - Compagnia as a philanthropic intermediary: first results	64

Annexes 66

# Fondazione Compagnia di San Paolo

Profile and history.

# Fondazione Compagnia di San Paolo

Profile and history.

## The governing bodies

Fondazione Compagnia di San Paolo is a private, independent, non-profit philanthropic foundation, with full constitutional autonomy, within a complex regulatory framework underpinned primarily by Italian legislative decree 153/99 and Constitutional Court rulings No. 300 and 301 – 2003, and by the Protocol of Understanding between the Italian association of bank and savings bank foundations (ACRI) and the Italian Ministry of Finance and the Economy (MEF) signed in 2015. As such, Fondazione Compagnia di San Paolo manages its assets independently, formulates and implements its own investment policy and allocates the income from its asset management to interventions of collective usefulness by means of grant-making instruments, whose beneficiaries include public and non-commercial entities with an altruistic mission. In accordance with its constitution, “Fondazione Compagnia di San Paolo pursues socially useful purposes, to promote civil, cultural and economic development.” This general definition applies to the “major areas” of Culture, Research, Public Health and Social Policy. Although the governing document does not impose any specific geographical limits on Fondazione Compagnia di San Paolo’s work, its main focus is Turin, Piedmont, Liguria and Valle d’Aosta in North-West Italy. As an Italian and European foundation, Fondazione Compagnia di San Paolo also has a secondary but significant range of action in the rest of Italy, in Europe (for projects that include Italian territory) and, for selected initiatives, in the international arena.

**General Council (Consiglio Generale)▶:** Compagnia’s policy-making body. It has a four-year term of office. Is tasked with establishing Fondazione Compagnia di San Paolo’s priorities, programmes and goals, including through its Committees, and monitoring the results thereof.

**Management Board (Comitato di Gestione):** appointed by the General Council and made up of five members, who automatically include the Chair and Vice-Chair. The Management Board holds office for the same period as the General Council, and the two bodies’ tenure expires at the same time. The Management Board enjoys full powers of ordinary and extraordinary management of the Foundation. The Managing Board is therefore responsible for approving decisions regarding interventions in key sectors.

**Chair ▶** appointed by the General Council, which also appoints the Vice-Chair. Holds office for four years, like the General Council, and can be re-appointed once; is Compagnia’s legal representative; chairs meetings, establishes their agenda and directs the work of the General Council and Management Board; is entitled to take urgent measures in the interests of Compagnia and reports on them to the Management Board.

**Secretary General ▶** appointed by the Management Board, holds office for the same period as the General Council and can be re-appointed. Heads Compagnia’s operational arm.

**Board of Auditors ▶** Compagnia’s supervisory body, appointed by the General Council and made up of three standing auditors, one of whom is the Chair of the Board of Auditors, and two alternate auditors. The Board of Auditors holds office for the same period as the General Council, and the two bodies’ tenure expires at the same time. Auditors can be re-appointed once.

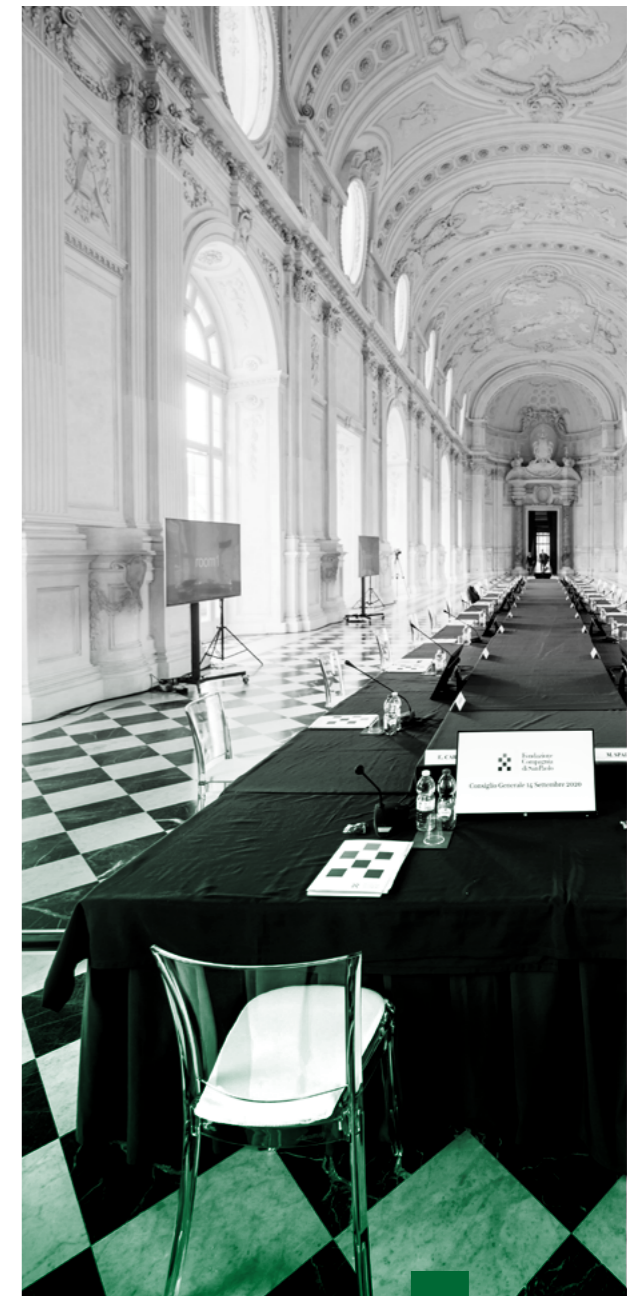

Compagnia aims to achieve gender balance in all governing bodies.

## The bodies responsible for appointing the General Council

Fourteen of the 17 Members of the General Council are appointed by 12 bodies identified in the constitution for their expertise and representativeness in the focus areas of Compagnia’s mission. The bodies currently responsible for appointing the General Council are: Turin Municipal Council, Piedmont Regional Council, Genoa Municipal Council, the Chambers of Commerce, Industry, Craft and Agriculture of Turin, Genoa and Milan, Unioncamere Piemonte, Accademia Nazionale dei Lincei, Accademia delle Scienze di Torino, Istituto Italiano di Tecnologia in Genoa, Fondo Ambiente Italiano (FAI), and the European Foundation Centre (EFC) in Brussels<sup>1</sup>.

The other three members are selected by the General Council on the basis of clear and undisputed renown, in such a way as to ensure a balanced line-up of specific and recognised professional skills and expertise in key sectors.

1. The European Foundation Centre (EFC) has now merged with the Donors and Foundations Network in Europe (Dafne) to form a single entity under the name Philea (Philanthropy Europe Association), which became legally operational in 2022.

## The co-governed bodies

Fondazione Compagnia di San Paolo is a member of ACRI (a network of foundations), Philea and NEF and is either a founder-member or a member of the governing board of the following co-governed bodies:

- Fondazione della Comunità di Mirafiori Onlus;
- Associazione Rete Dafne;
- Fondazione Comunitaria della Valle d'Aosta;
- Fondazione Centro Studi sul Federalismo;
- Associazione per lo Sviluppo della Valutazione e l'Analisi delle Politiche Pubbliche;
- Fondazione Polo del '900;
- Fondazione Comunità Chierese;
- Associazione Globus et Locus - Milan;
- Consulta per la Valorizzazione dei Beni Artistici e Culturali di Fossano;
- Consulta delle Fondazioni di origine bancaria del Piemonte e della Liguria;
- Palazzo Ducale Fondazione per la Cultura - Genoa;
- Fondazione Luigi Einaudi - Turin;
- Fondazione Torino Musei;
- Fondazione con il Sud;
- Collegio Universitario Renato Einaudi;
- Associazione Urban Lab;
- Fondazione Centro per la Conservazione e il Restauro dei Beni Culturali "La Venaria Reale";
- Xkè? ZeroTredici S.c.r.l.;
- Museo Nazionale del Cinema - Fondazione Maria Adriana Prolo - Archivi di Cinema, Fotografia ed Immagine;
- Fondazione del Teatro Stabile, Turin;
- Fondazione Contrada Torino Onlus;
- Consulta per la Valorizzazione dei Beni Artistici e Culturali di Torino;
- Fondazione Museo delle Antichità Egizie;
- Associazione Studi e Ricerche per il Mezzogiorno;
- Fondazione Comunitaria della Riviera dei Fiori Onlus;
- Consorzio delle Residenze Reali Sabaude;
- Fondazione Comunitaria del Verbano Cusio Ossola;
- Fondazione Teatro Regio di Torino.

As well as these institutional holdings, Compagnia has corporate holdings as listed in the relevant section of the Financial Statements.

## The cross-cutting functions

The Cross-Cutting Functions (CCFs) serve Fondazione Compagnia di San Paolo's institutional activity and form an integral part of it:

- Impact Innovation, in conjunction with the Finance Department and under the management of the Chief Financial Officer (CFO);
- Planning, Research and Evaluation;
- Operations;
- Communication.

The CCFs have the dual task of ensuring that Fondazione Compagnia di San Paolo operates as an "organisational machine" and providing the Line Functions with the necessary services - communication, management, organisation, methodology, consulting, information - to optimise Compagnia's work as a philanthropic foundation with a high degree of operational complexity. In doing so, they respond to signals and requests from "internal customers" in the form of Compagnia's Governing Bodies, Goals, Missions, CFO and other CCFs. They also develop their own capacity for initiative-taking and their own agenda, with benefits for the Foundation's work as a whole. The operating costs of the CCFs form part of Fondazione Compagnia di San Paolo's structural costs: most of these resources therefore combine with Compagnia's grant-making resources, which are deployed directly or indirectly for the benefit of the catchment area.

Lastly, Fondazione Compagnia di San Paolo has a Governance function, which supports the orderly running of the Foundation's constitutional affairs. It also assists the Executive Bodies in managing institutional and international relations, as well as in preparing documentation directly relating to their activities.

**GRAND CHALLENGE**  
Sustainable development of local communities for the common good.

Political agenda and civic commitment

**Culture Goal**

**People Goal**

**Planet Goal**

Clear, targeted objectives

**The organisational model**

Compagnia's organisational model draws inspiration from European planning practices, which simultaneously emphasise the coherence, integration and flexibility of the action within an organisational system, in which the intentional focus (i.e. with a specific mission) of each operating unit contributes to the pursuit of the underlying goal. This underlying goal gives rise to missions, which in turn develop coherent mission projects.

In Fondazione Compagnia di San Paolo's parlance, the "sustainable development of local communities for the common good" is a "grand challenge", pursued via three Goals that identify (in the light of agenda 2030) three key dimensions: Culture, People, Planet. The Goals are pursued through 14 missions, each of which manages a coherent portfolio of projects, in terms of subject matter and aims.

**Missions**

- 1. Building capacity to attract.**  
Promoting an area's capacity to attract through culture and creativity.
- 2. Developing skills.**  
Supporting skills training in the cultural arena as an agent of development in society.
- 3. Preserving beauty.**  
Preserving our cultural and artistic heritage and landscape.
- 4. Encouraging active participation.**  
Encouraging people to take part in the community and culture to foster an inclusive society that prioritises human welfare.

**Missions**

- 1. Reinventing dwelling systems and regenerating neighbourhoods.**  
Supporting social housing and urban regeneration.
- 2. Promoting decent work.**  
Increasing the number of fair, stable opportunities for the employment of vulnerable people.
- 3. Educating for collective development.**  
Promoting high-quality, inclusive education, equal educational opportunities and the welfare of children and teenagers.
- 4. Rediscovering community.**  
Promoting resilient communities that value solidarity.
- 5. Working together for inclusion.**  
Contributing to the development of inclusive, interconnected, skills-rich communities.

**Missions**

- 1. Harnessing the value of research.**  
Encouraging research and top-quality education to improve economic fundamentals and facilitate local development.
- 2. Boosting innovation.**  
Financing and promoting innovation and technology transfer, to impact on social challenges, among other purposes.
- 3. Promoting well-being.**  
Encouraging healthy life-styles and strengthening prevention systems through effective health services.
- 4. Fostering international opportunities.**  
Supporting the international vocation of local players and attracting new international opportunities for the local area.
- 5. Protecting the environment.**  
Trialling actions aimed at environmental sustainability and awareness.

Project portfolio and bottom-up trials

# Annual Report 2021.

There are moments in history that catch people off guard and leave them speechless. April 2022 is one of those moments. Seeing war flare up again on our continent, especially a war of aggression like the one in Ukraine, comes as a shock. It challenges the very concept of philanthropy: what kind of love and what kind of humanity is emerging in the wake of a pandemic that many hoped would make us more compassionate towards each other?

And yet it is neither right nor possible to respond with silence or inaction. This is true of any field, but especially the field of institutional philanthropy. Ever since they first emerged, foundations, including Compagnia di San Paolo, have been based on the conviction that the potential for good in the world is too great to allow it to go to waste due to a lack of faith in the possibility of channelling it into practical action. And foundations have a responsibility to keep channelling it even at the most difficult moments, regardless of whether those moments affect the world as a whole or the marginalised people of an outer-city district. Without this faith and commitment, foundations would struggle to find the sense of purpose that translates values into practical action.

Ever since they first emerged, foundations have been based on the conviction that the potential for good in the world is too great to allow it to go to waste.

Compagnia di San Paolo's 2021-2024 Multi-Year Planning Document, which was first put into practice and validated in 2021, is built on the principle of harnessing the positive energies of our neighbourhoods. As the words and figures in this report illustrate, we have road-tested an array of innovative tools, and organised them into a system designed to support the multiple talents that make up civil society, and the network of local public institutions that play such a vital role in Italy's democratic and community life. Compagnia quickly realised that today's challenges would force foundations of its type to make significant changes to their role and practices: the post-pandemic reconstruction, enabled by a European intervention designed to address Italy's particular weakness, to be honest, entailed a duty to make major leaps forward at every level. The system certainly needs a reboot, but it also needs to dissociate itself from the weaknesses and inefficiencies, which – due to inertia, superficiality and, let's face it, a failure to appreciate the full extent of the changes taking place – have made Italy as poor in future-oriented achievements as it is rich in resources.

Safeguarding the planet and integrating digital opportunities into our ways of creating, consuming, producing and helping, need to be built into social, political and economic action, not least in the third sector. And all this must be founded on the actual possibilities and capabilities of our local communities. The education system, combined with educational communities and research, represents one of the tools for effecting this gradual but demanding revolution in the mindset, skills and practices firstly of citizens and secondly of operators. So if we are to foster change in the medium-to-long term and help pave the way to long-term commitment, we bear full responsibility for kick-starting positive dynamics now and in the short term. This is the driving force behind two of the priorities clearly set out in our strategic plan: firstly, maximising the impact of the Foundation's grant-making (which does not mean focusing exclusively on projects whose

success is already guaranteed) and secondly, helping local social operators, including cultural and educational bodies, to develop an intelligent organisational resilience with immediate effect (which does not mean focusing exclusively on the corporate aspects of organisations). The National Recovery and Resilience Plan, which touches upon major systemic issues, some of which coincide with the scope of the work of Compagnia and its partners is both a symbol and a very real opportunity to make this transformation. Now is the time for efficiency and innovation, both of which are pre-conditions for sustainable human and economic development. As highlighted at the recent ACRI Conference in Cagliari (April 2022), we can use these tools to weed out the mechanisms that are still giving rise to unfair inequalities – of gender, age, culture, income and access to services – in Italy and elsewhere, by acting on the premise that all this can go hand in hand with a clear and fruitful policy of “environmental reconciliation.” The young and future generations have a right to expect this from us.

Readers who have the patience to examine this report will see how Compagnia di San Paolo turns these principles into practical action through our Goals and the framework put in place by our cross-cutting dimensions: environment, digital, knowledge, well-being, geographies and opportunities. I would like to end by thanking everyone without whose work Compagnia di San Paolo would simply not exist: our governing bodies and staff, but equally our partners and stakeholders. Compagnia is a community, and the fact that it is built on a plethora of relationships forms a strong part of both its current and historic identity. It is a community that strives for peace and always keeps sight of the fact that peace is built on justice.

Turin, April 2022

**Francesco Profumo**  
Chair of Fondazione Compagnia di San Paolo

# Part 1 2021. Overview.

# 1. 2021. Overview.

## 1.1 How to read the data

In the course of 2021, Fondazione Compagnia di San Paolo approved 1,049 interventions for a total value of 158,670,934.59 euros, payable from funds pertaining to the annual budget or allocated for grant-making purposes in prior years.

The data relating to Fondazione Compagnia di San Paolo's institutional activity needs to be read with a certain care, especially with regard to the budget origin date of the funds. All possible steps have been taken to avoid duplications in the information provided, despite the fact that Compagnia's work naturally includes initiatives that do not reach completion within the course of a single year (from allocation to payment of the final tranche of funding). The use of funds allocated from the budgets of prior years is reported in such a way as to show how it is distributed across the various goals.

As is normally the case for entities operating on a continuous basis, the number and total value of grant payments made in a given year may exceed the allocations made in the same year. Some of these, in fact, may appear in years after the budgetary year to which they pertain, mainly because of the duration of the specific characteristics of the various projects supported, which dictate the frequency and amount of the tranches into which the grants are divided.

It is worth noting, however, that not all allocations give rise to a single project: grants awarded on the basis of calls for proposals are a good example of this, as they generally depend on a single initial allocation, namely the one that gives rise to the call for proposals. This is then divided into multiple grants (awarded to the winners of the call) in the year in question and potentially also in subsequent years.

## 1.2 Grants

The total amount of allocations made in 2021 exceeds the value announced in the Multi-Year Planning Document 2021-2024 (amounting to a budgetary figure of 135 million euros). The Multi-Year Planning Document in question explained that any additional resources arising from profits on Compagnia's assets or other operations would be used in strategic projects during the period (see MYPD 2021-24, page 49).

As explained above in the section covering the organisational structure, Fondazione Compagnia di San Paolo is made up of three Goals and 14 Missions. The table below summarises the grant-making activity of the Goals and their Missions for 2021, as well as reporting on the limited grant-making activity of the Planning, Research and Evaluation Department.

TABLE 1.1 ALLOCATIONS BY TARGET (THOUSANDS OF €)

Compagnia di San Paolo's grant-making activity spanned 1,049 projects for a total of 158 million euros. In numerical terms, the projects are distributed across the Culture Goal (50%), People Goal (32%) and Planet Goal (17%), whereas from a financial point of view, in line with the previous year, the People Goal accounted for about 43%

of all grant-making, followed by the Planet Goal (31%) and the Culture Goal (26%). As explained later, the Planning, Research and Evaluation Department also awards grants, albeit to a more limited extent, in relation to applied socio-economic research.

### 1.3 Scale of interventions

Against a broadly stable backdrop, 2021 saw a reduction in both the number and value of interventions approved in relation to projects below the 10,000 euro threshold (these fell from 19% to 16% by number, and from 0.9% to 0.75% by economic value). The 50,000-500,000 bracket accounts for the largest slice of financial value again this year (33.5% of total grants disbursed).

Large projects are very limited in number, but account for a substantial share of grant-making resources: considering the two largest-scale categories (i.e. over a million euros), little more than 2% of allocations accounted for almost 50% of the resources committed by Compagnia.

TABLE 1.5 ALLOCATIONS BY SIZE CLASS, 2021 / 2020

SIZE CLASS	AMOUNT AWARDED		PRIOR YEAR		INTERVENTIONS		PRIOR YEAR	
	euros	%	euros	%	No.	%	No.	%

◀ FIGURE 1.2 INTERVENTIONS BY SIZE CLASS, 2021

## 1.4 Applications approved and rejected

In 2021, Fondazione Compagnia di San Paolo accepted approximately 46% of the number of applications received, accounting for 67% of the total funding applied for. Compared with 2020, the number of applications accepted fell slightly (from 50% to 46%), but their value increased (from 60% to 67%).

Apart from the obviously limited availability of resources, applications for funding were rejected, as in previous years, mainly on the grounds that a given call for proposals attracted other projects that were deemed better, that the proposed intervention was not of high priority, or that it was ineligible in terms of form or substance (Tables 1.6 and 1.7).

TABLE 1.6 APPLICATIONS BY SECTOR OF EXPENDITURE

## 1.5 Type of interventions

Although all falling into the general category of non-repayable grants, the resources awarded by Compagnia correspond to different approaches to intervention, which in turn derive from the Foundation's strategic policy direction, as well as from the nature and purpose of the individual projects and the most effective ways of supporting them. In 2021, 24% (in line with 2020) was allocated to grant-making aimed at speculative applications, i.e. projects presented mainly by private social-sector organisations, or to applications which, despite being coordinated within Fondazione Compagnia di San Paolo's strategic planning and therefore often integrated into the Foundation's "own" projects, nonetheless retain a high degree of independence and specialisation<sup>2</sup>.

In line with its long-standing modus operandi, Fondazione Compagnia di San Paolo continued to offer the usual levels of support for its auxiliary bodies, which absorbed about one fifth of total resources.

Compagnia's multi-year framework agreements with universities and local public bodies took third place in terms of resources awarded (19%). Agreements with local public bodies contain multiple project components and various recipient entities.

The other forms of grant-making are grants to co-governed bodies or bodies of which Compagnia is a founder member (in this case it often makes appointments to the governance bodies; this category does not include auxiliary bodies), grants awarded as a result of calls for proposals, and lastly a share allocated to operational projects or own programmes, i.e. initiatives which Compagnia opts to lead and direct, because they are seen as strategic or exemplary. With regard to these projects, the amount provided represents only part of Compagnia's commitment, because the Foundation channels part of its permanent staff's design and management work into them.

TABLE 1.8 PROJECTS AND GRANTS BY TYPE OF INTERVENTION

TYPE OF FUND	PROJECTS			PRIOR YEAR		GRANTS AWARDED			PRIOR YEAR	
	No.	%	of which multi-year	No.	%	euros	%	of which multi-year	euros	%

Calls for proposals (e)	417	39.75%	1.62%	366	33.70%	20,230,889	12.75%	0.96%	16,496,640	9.80%
Agreements (f)	93	8.87%	23.70%	109	10.04%	29,819,040	18.79%	10.75%	28,085,960	16.69%
Integrated projects, operational projects	136	12.96%	21.57%	147	13.54%	17,243,955	10.87%	11.76%	17,757,499	10.51%
<b>TOTAL</b>	<b>1,049</b>	<b>100%</b>	<b>8.38%</b>	<b>1,086</b>	<b>100%</b>	<b>158,670,934</b>	<b>100%</b>	<b>4.19%</b>	<b>168,364,144</b>	<b>100%</b>

2. About 50% of the value in this category depends on the fund to combat educational poverty (about 16 million) and on provisions made for future activities whose operational form is not yet fully defined.

3. Final year of use of this form of grant-making.

## 1.6 Recipients of resources by legal form

Fondazione Compagnia di San Paolo can only award contributions to non-commercial or public bodies, and is not entitled to fund natural persons and for-profit entities (other specific exclusions, such as political parties and initiatives of proselytism, are specified in the Foundation's internal regulations governing institutional activities).

The picture for 2021 is broadly in line with 2020. Contributions to foundations accounted for 37% of total funding and relate mainly to support for Compagnia's auxiliary bodies, which take the legal form of foundations. Compagnia's operational projects continue to play a major role, accounting for 25% (up from 20% in 2020), thus returning to the share they held in 2019. Third place goes to recognised associations.

The caption "Operational projects and provisions" covers items that the departments prepare in order to launch projects of various types (calls for proposals, guidelines, direct actions), in which the legal nature of the final recipient is not yet defined at the time of approval. These sums are therefore reported under the caption "Compagnia di San Paolo, operational projects and provisions" until the type of recipient is identified.

N.B. The distribution corresponds to the list of legal forms to choose from on the Online Application platform, on which applicants for funding can identify their status when submitting applications (which appear alongside the group of operational projects managed directly by Fondazione Compagnia di San Paolo).

## 1.7 Geographical distribution of funding

From a geographical point of view, the distribution of Compagnia's contributions for the Turin area in 2021 remains broadly stable (78% as against 76% of resources in 2020 and 80% in 2019). The slight growth over the past year is offset by a reduction in the share of resources for the Metropolitan City of Turin. However, this concentration in Turin, which is in line with Compagnia's specific policies and historical

tradition, is amplified by the fact that organisations such as universities, major hospitals and leading cultural bodies, which fulfil their function well beyond the city limits, are based in Turin. In addition to Piedmont, the city of Genoa (5.75% of grants awarded) and Naples and Southern Italy (3.6%) are significant areas for Compagnia's philanthropic work. The remaining interventions, focusing on Lombardy

and North-East Italy, have increased from 0.3% to 1.2% of the total value. The value of grants to foreign organisations accounts for less than 1% of the total, although many of the "local" projects supported have links with and positive effects on other countries, especially in Europe.

### 1.8 Calls for proposals issued by Compagnia di San Paolo in 2021

The 2015 ACRI-MEF protocol identified transparent, competitive calls for proposals as the standard procedure by which foundations award grants. They are an effective tool, but cannot be the only one used by grant-making organisations: own programmes, formal agreements with large and essentially “unique” beneficiary bodies, and channels for speculative applications are not only advisable, but often necessary. Nonetheless, Fondazione Compagnia di San Paolo’s tool-kit includes various additional types of call for proposals that supplement the basic type. One of these is two-stage calls for proposals, which involve two selection phases, the first focusing on the basic idea and the second focusing on detailed designs produced by the winners of the first. Another is the introduction of specialised thematic capacity-building processes for participants. Both types were widely used in 2021 and often operate in conjunction with each other.

Compagnia di San Paolo published 24 calls for proposals in 2021 (payable from funds not pertaining exclusively to the 2021 budget) with a total value of 32.9 million euros: the Culture Goal published a total of seven calls (with a total

value of 7.6 million euros), while the People Goal and the Planet Goal published six calls each (with total values of 5.6 million and 8.2 million euros respectively). These were complemented by two Next Generation calls for proposals (totalling 8.2 million euros) and three cross-Goal calls: two involving a partnership between the Culture and Planet Goals (totalling 358,000 euros) and one between the Culture and People Goals (totalling 130,000 euros).

The number of candidates and winners varied widely according to the type of grant. The number of candidates ranged from a minimum of four to a maximum of 367, while the number of winners ranged from a minimum of four to a maximum of 100. The amounts awarded to winners also varied widely from one call to another, ranging from a minimum of 2,200 euros to a maximum of 450,000 euros per winner.

Overall, 36% of candidates won calls for proposals in 2021. Of these winning candidates, 25% had responded to calls from the Culture Goal, 13% to calls from the Planet Goal and 64% to calls from the People Goal.

TABLE 1.12 COMPAGNIA'S CALLS FOR PROPOSALS IN 2021

2.

# The Multi-Year Planning Document 2021-24.

The launch of monitoring.

FIGURE 2.1 MENTORING

## 2.1 The launch of monitoring of the Multi-Year Planning Document 2021-24

The grant-making statistics presented in the previous chapter provide a concise but comprehensive picture of Compagnia's work. They do not, however, reflect the type, complexity and multi-faceted nature of the effects that the Foundation is committed to generating through its partnerships with the bodies it funds. The impact of a year's work by a philanthropic foundation such as Fondazione Compagnia di San Paolo can only be explained by going into greater detail about the nature of the activities that the Foundation has helped make possible and their effects.

This is all the more applicable because the Multi-Year Planning Document 2021-24 emphasises the importance of complementing the "sensitivity" that forms an integral part of all philanthropic activity with a substantial set of data and indicators, as is standard practice across the entire international philanthropic community. In view of this, Compagnia started collecting more data about its grant-making in 2020, for the dual purpose of making it easier to understand the meaning of the Foundation's work and improving the impact of it by comparing data on processes with data on results. Monitoring the application of the Multi-Year Planning Document therefore acts as a compass, a reporting tool and a learning tool, designed to boost the efficiency and effectiveness of the Foundation's work.

With the launch of the Multi-Year Planning Document 2021-24, we therefore decided to dedicate a section of this report to an initial analysis of the data collected in relation to the indicators that the MYPD used for monitoring purposes. It is an initial analysis because it contains data about projects and initiatives that were launched in 2021 but did not necessarily reach completion in that year. In any event, it includes data

about 2021 activities for which definitive data has since been obtained. The information will become more complete year by year and the nature of certain targets set in the MYPD 2021-24 is such that it will not be possible to determine how far they have been achieved until the full planning period comes to an end.

This analysis covers the following: data collected to enable readers to view Compagnia's initiatives through the lens of the SDGs set out in the United Nations Agenda 2030; results data relating to measurements of the initiatives' outputs; and details of the distribution of the initiatives between the six "cross-cutting dimensions" that the MYPD uses as an important criterion for interpreting Fondazione Compagnia di San Paolo project action. Lastly, we will present a series of initiatives launched in 2021 (the second year of the pandemic and the first year of the National Recovery and Resilience Fund), with which Compagnia intends to help organisations boost their capacity to innovate, manage, raise funds and design and deliver projects. This philosophy, under which Compagnia provides public and third-sector bodies with opportunities for organisational growth, has given rise to a cross-sectoral line of intervention and three calls for proposals, whose titles - Next Generation You, Next Generation We and Next Generation School - reflect the major Next Generation EU recovery plan launched by the European Commission. This line of work got under way in 2021 and will continue in the remaining years covered by the MYPD 2021-24.

## 2.2 The contribution of 2021 grant-making activities to achieving Sustainable Development Goals

In 2020, Fondazione Compagnia di San Paolo re-aligned itself around the Sustainable Development Goals (SDGs) defined in the United Nations (UN) Agenda 2030, and this choice was confirmed in the MYPD 2021-24, which contains further details. This alignment involves every provision that is associated with one or more SDGs. Furthermore, each Goal and Mission covers a certain number of SDGs.

Thanks to the cooperation of bodies that complete the application forms, or to their completion by the departments in other cases, the approved amount is available for distribution on a per-SDG basis in 2021.

The graph below illustrates the breakdown of 2020 projects and grants by SDG.

The projects supported in 2021 and the wide range of the goals set out in Agenda 2030 have a particular focus on SDGs 4 (Quality Education), 11 (Sustainable cities and communities), 10 (Reduced inequalities), 8 (Decent work and economic growth), 1 (No poverty) and 8 (Good health and well-being). For anyone familiar with Fondazione Compagnia di San Paolo, this data simply confirms an orientation that was already clearly visible. It also provides clear evidence of Compagnia's emphasis on education, which has been stepped up over the past year.

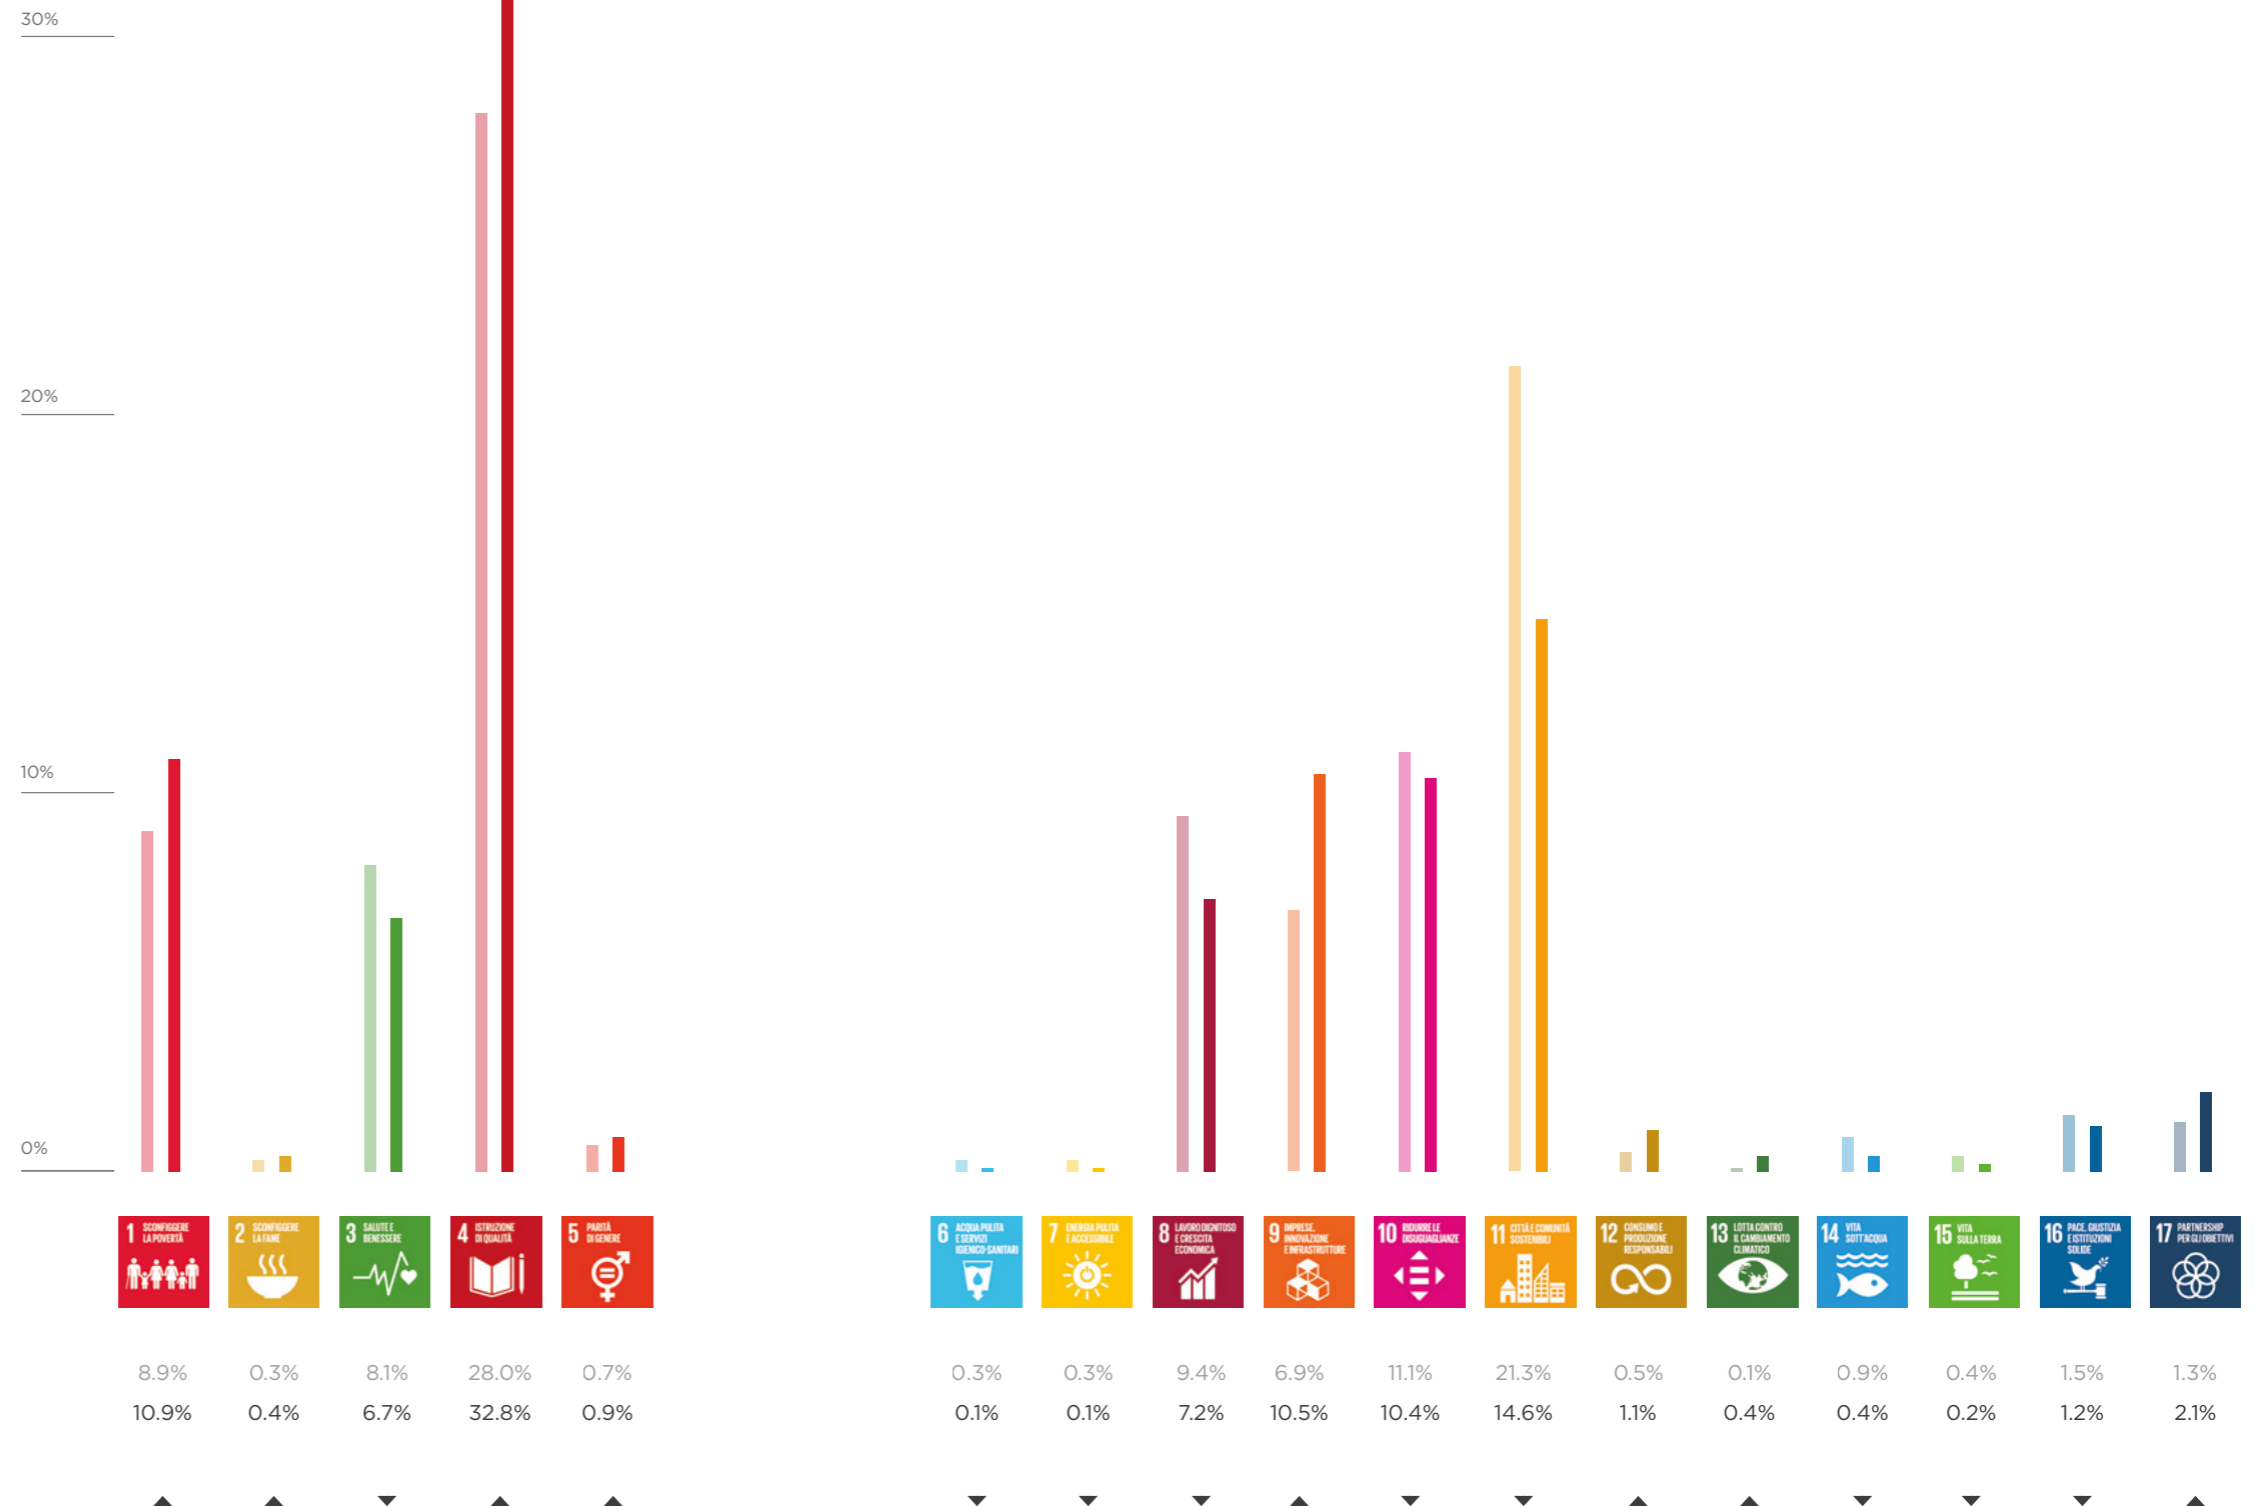

FIGURE 2.2 DISTRIBUTION OF AMOUNT AWARDED, 2020 / 2021

The total percentage was calculated only for projects that could be associated with one or more SDGs. For 2020, the amount concerned was 141,420,000 euros, and for 2021, there were 986 projects with a total value of 149,707,614 euros.

Amount awarded 2020  
Amount awarded 2021

### 2.3 The launch of monitoring of the strategic plan

With its Multi-Year Planning Document 2021-2024, Compagnia made specific commitments to its catchment area, which go beyond mere funding figures and set measurable targets for the supported initiatives. Each Goal set down result indicators both at Goal level (Goal targets) and Mission level (Mission KPIs). All beneficiary bodies, including Compagnia Group’s auxiliary bodies, have been instructed to start collecting and sharing these indicators, which are designed to reflect at least some aspects of the impact of the projects that Compagnia takes part in by providing economic or other resources. In view of the scale and complexity involved, the process took several months to design, test and develop in terms of indicators, sources and IT infrastructure. Devising a data collection system involved taking account of all actors in a position to provide data through their interaction with Compagnia, including Mission Managers, organisations awarded grants on the basis of calls for proposals or speculative applications, auxiliary bodies and bodies that received support for institutional activity in 2021 (a financing arrangement that came to an end in 2021). The task also requires a high degree of ongoing maintenance, both in terms of ensuring that the indicators remains appropriate and validating the input data. As always, the time factor is significant: reporting on projects funded in a given year obviously takes place after their completion, according to time-scales that differ from one project to the next. Moreover, actual “impact assessments” (see section on the Planning, Research and Evaluation Department) are usually carried out after the reporting date.

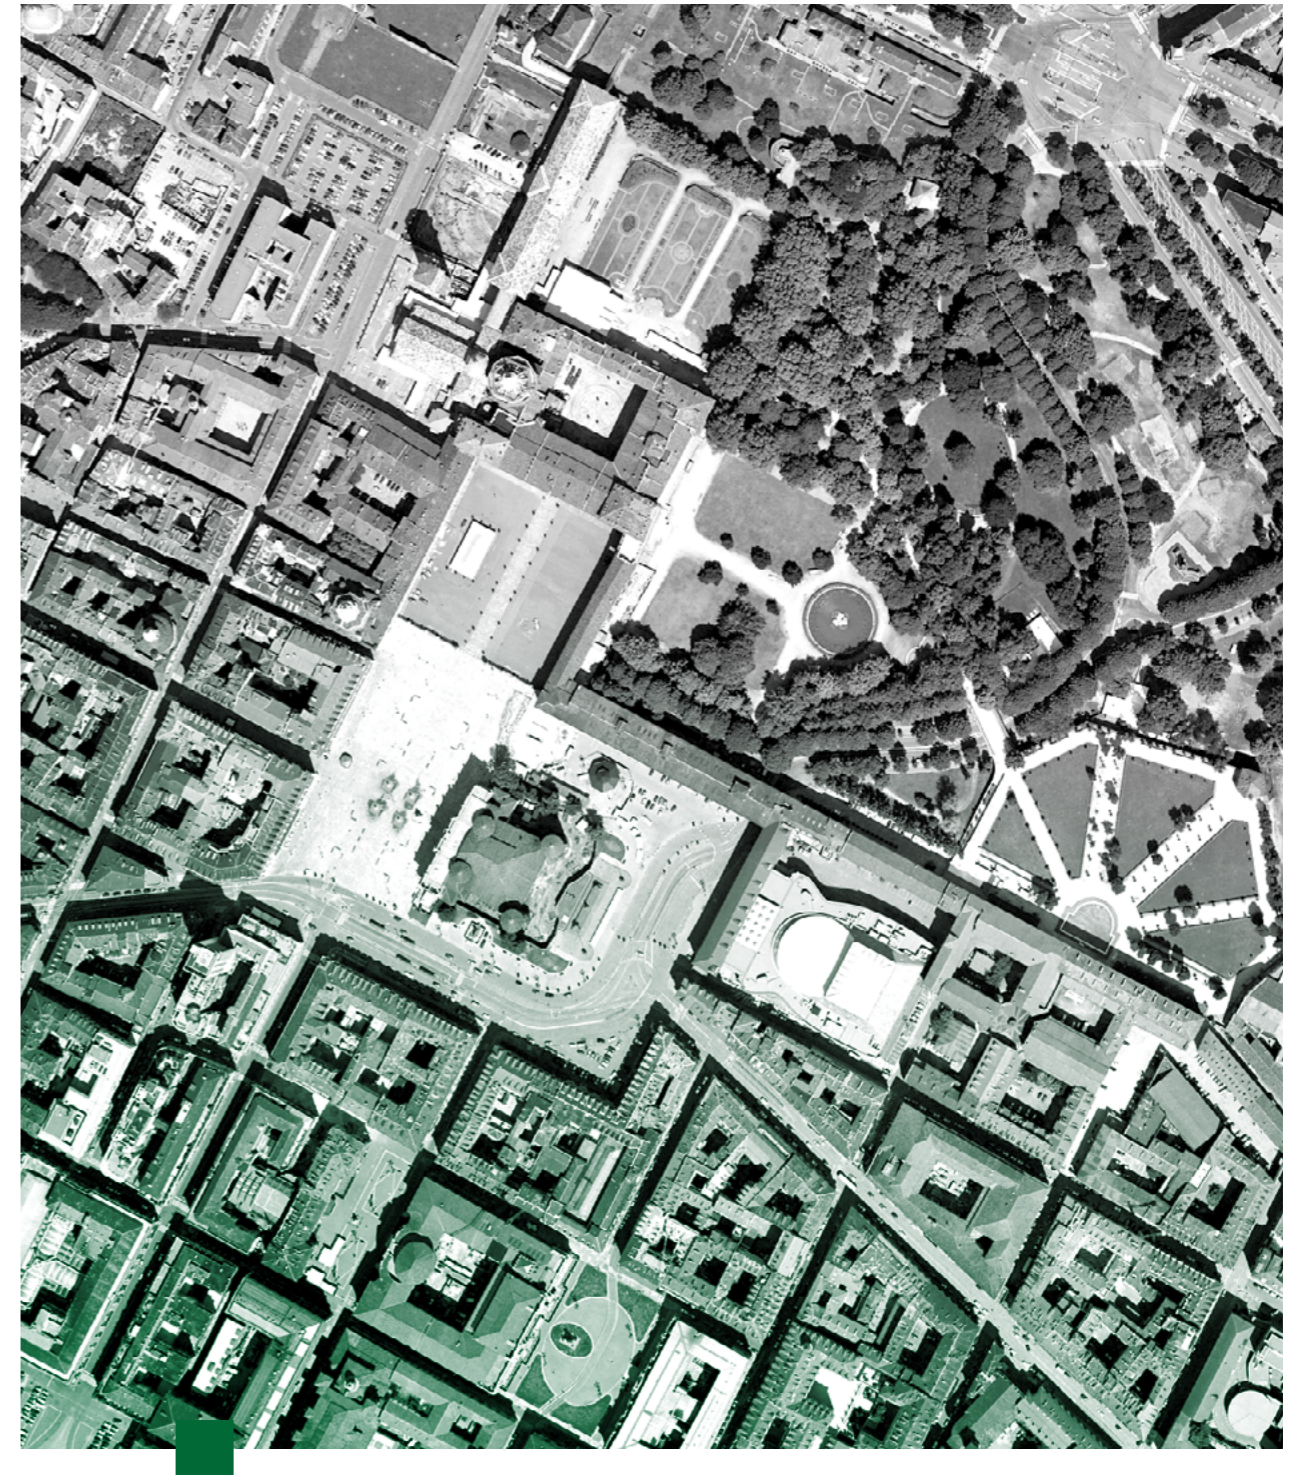

Figure 2.6 describes the data sources for the monitoring process.

The online application system used questionnaires to collect specific information about the project's impact, at the time of both application (forecast) and reporting (on project completion). The subsequent statistics are based on the data provided by the relevant bodies at the time of reporting or on reconstructions of specific internal information flows by Compagnia's departments.

Overall, the data enables us to estimate that a project funded by Compagnia di San Paolo in 2021 generated approximately 10 million "experiences of involvement". We use the term "experiences of involvement", rather than "people", because these "contacts" are likely to involve the same people multiple times (many of whom are not even aware of Compagnia's role, as in the case of visitors to restored cultural heritage assets or patients examined with new hospital diagnostic machines: the assessments are carried out by the project managers).

As regards the number of bodies that have worked directly or indirectly with Compagnia on projects launched in 2021, 1,534 "contacts" were established, including with public bodies (513), third-sector bodies (725) and for-profit companies (296). The latter can belong to collaboration networks involved in projects co-funded by Fondazione Compagnia di San Paolo, although they are not eligible for any kind of grant from it.

An impact report provides in-depth analysis of the data for 2021 and the first half of 2022.

## 2.5 Cross-cutting dimensions

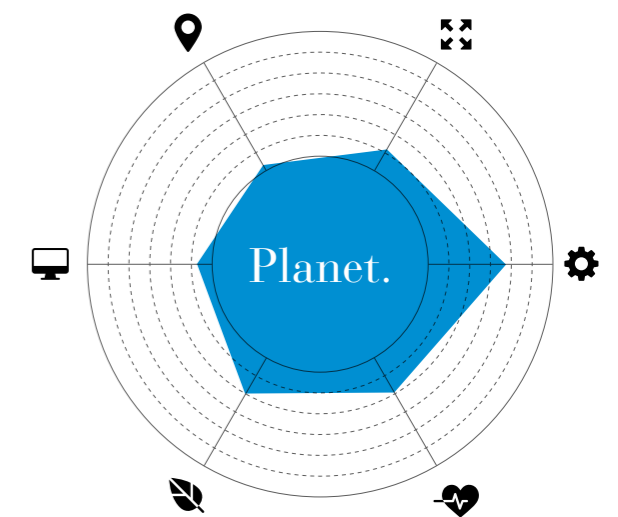

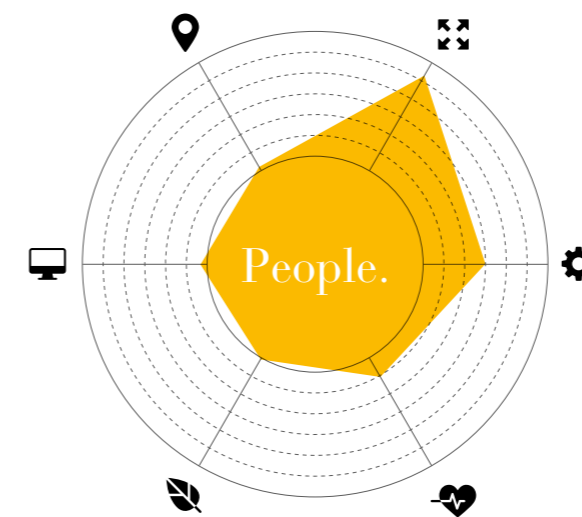

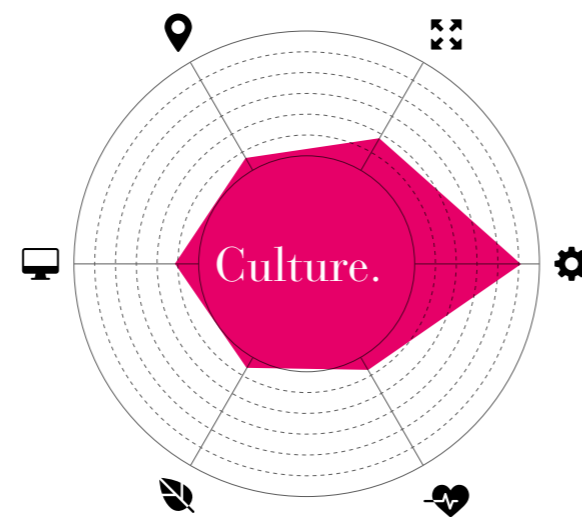

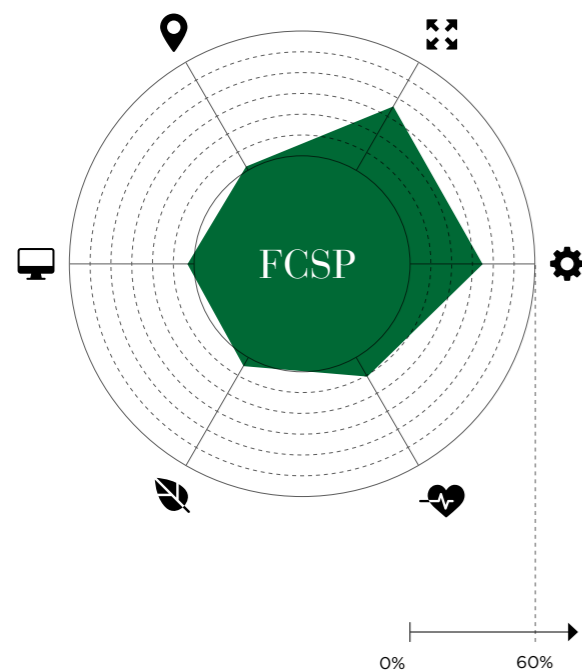

As well as using SDGs and result indicators, Compagnia monitors the MYPD 2021-24 on the basis of the six cross-cutting dimensions introduced by the document, namely digital transition, geographies, opportunities, knowledge, green transition and well-being. Some of these dimensions correspond directly to the major European goals transposed into Italy's National Recovery and Resilience Plan, while others are more extensive reformulations.

Compagnia did not start allocating projects to these dimensions until the second half of 2021, so the data relate to the last two quarters rather than the whole year. Knowledge and Opportunities are the dimensions that account for the largest slice of funding, bearing witness to the fact that learning remained one of Compagnia's highest priorities for 2021. It is viewed as a constant of everyone's life (the cross-cutting dimension defined as "Knowledge" accounted for 35% of funding awarded) and a means of generating opportunities for people affected or at risk of

being affected by exclusion and inequality (the dimension defined as "Opportunities" also accounted for 35% of funding awarded). More than a tenth (11%) of the resources awarded by Compagnia in 2021 were invested in supporting initiatives aimed at safeguarding physical and mental health (the cross-cutting dimension defined as "well-being"), which became even more important against the backdrop of the pandemic. This was followed by two of Compagnia's relatively new cross-cutting dimensions, which now account for significant slices of funding, namely environment ("green transition", which absorbs 5% of funding awarded) and "digital" (3%). This is another example of a project that contains more than meets the eye: many of the supported projects, which serve a primarily social or cultural purpose, also contain elements of digital innovation as enabling features.

TABLE 2.1 / FIGURE 2.4 THE CROSS-CUTTING DIMENSIONS BY VALUE OF FUNDING AWARDED, 2021

CROSS-CUTTING DIMENSION	Fondazione CSP	Culture	People	Planet	
Opportunities	26,947,000	35%	18%	53%	12%

<b>Total provision</b>	<b>77,649,000</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>	<b>100%</b>

### Part 3

# Goals and Missions

of Fondazione Compagnia di San Paolo:  
2021 activity

### 3.

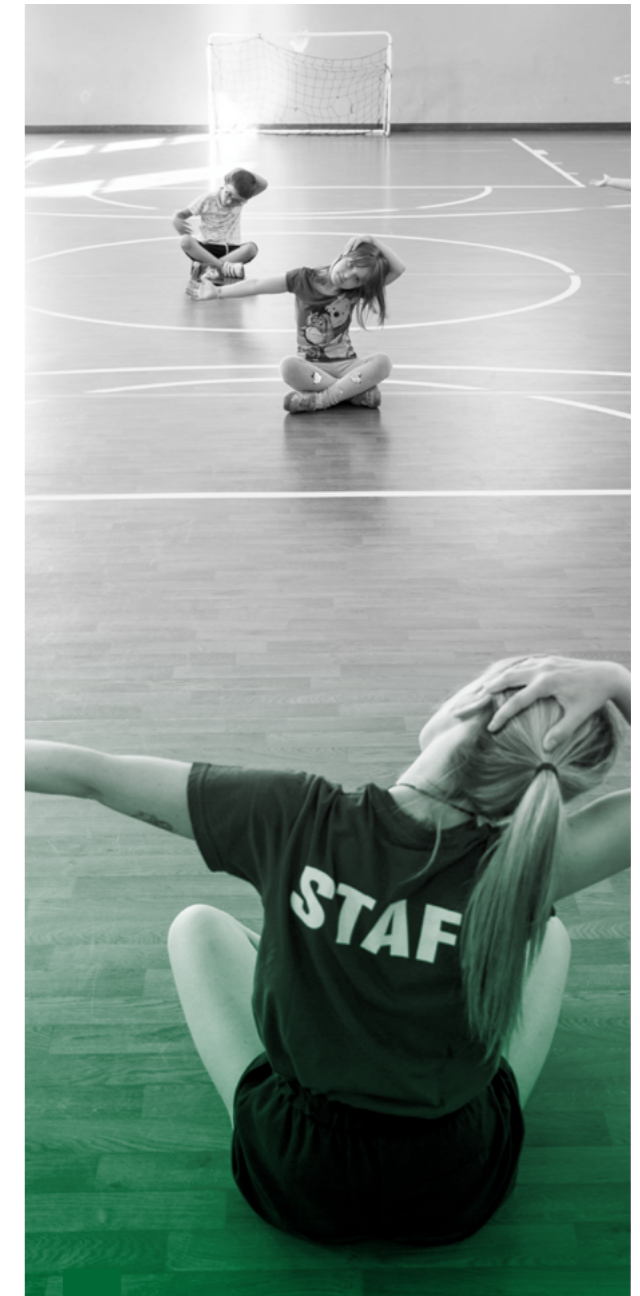

## Goals and Missions

of Fondazione Compagnia di San Paolo: 2021 activity.

This section sets out the activities of each Goal and each of the Missions reporting to them in 2021. Fondazione Compagnia di San Paolo Foundation supports so many initiatives that they cannot all be presented here, but the highlights are covered in this section. A summary of the operational philosophy of the Culture, People and Planet Goals, and the lines of action they have undertaken over the year, is followed by a fact-sheet for each Mission. As well as setting out the overall strategy assigned to the Mission by the MYPD 2021-24, the fact-sheets include profiles of individual projects or groups of projects of particular relevance to the Mission, and details of two initiatives of an exemplary nature. These interventions tend to stand out for their originality and innovative content, rather than their economic scale.

### Working with Covid: second year

Through a succession of waves and variants, Covid inevitably disrupted Compagnia's work programme in 2021, despite the fact that the organisation was well prepared to expedite a return to normal, while facilitating the reconstruction – and innovation – of systems that the pandemic had weakened or put under strain. Several of the sectors that Fondazione Compagnia di San Paolo traditionally works with, such as health, education, culture and social care, found themselves in the midst of an operational crisis, while also facing an increase in social vulnerability – with growing inequalities and declining opportunities – and the forced change of many long-standing habits. With rising demand for social services, a collapse in demand for live cultural events, organisational limitations across the board and the emerging potential of the digital sphere, the pandemic obviously affected everyone, but it also triggered positive reactions, inventiveness and commitment. First and foremost, Compagnia responded on the social and healthcare fronts, by deploying two vaccination hubs in Turin, for adults and children (see the Promoting Well-being Mission), but its entire modus operandi revolved around the Covid effect. It would be fair to say that every project was coloured by Covid in terms of both method and content. Continuing what it started in 2020, Compagnia developed appropriate organizational and administrative responses. It switched a vast amount of work involving personal interaction, training and co-design, both internally and with partners, to online channels, without any loss of productivity. Furthermore, it continued to offer organisational flexibility by granting extensions, rescheduling project time-lines and dividing grants into instalments so as to prevent partner bodies from suffering cash-flow crises as far as possible. Some of the emergency initiatives undertaken in 2020 – which proved to be life-savers in the social and cultural arenas – taught Compagnia more about the real needs of its partner bodies, before being adopted as ordinary, repeatable tools by 2021.

Goals and  
Missions

# Culture Goal.

- 1 Building capacity to attract
- 2 Developing skills
- 3 Preserving beauty
- 4 Encouraging active participation

## The Culture Goal and its Missions

In 2021, the first year of implementation of the MYPD 2021-24, the Culture Goal was primarily engaged in designing new lines of intervention and reconfiguring existing fields of work, in the light of new policy directions. In the first instance, this involved harnessing the cultural dimension as a facilitator of human and local development in conjunction with other dimensions, such as social care and technology. In order to translate the policy directions of the MYPD into actions, the Culture Goal had to undertake research, mapping and analysis, with input from various partners, so as to design robust intervention tools that would meet the needs identified and achieve the intended impact of the plan.

The need to counter the fall-out of the pandemic on the cultural sector prompted Fondazione Compagnia di San Paolo to make a number of extraordinary interventions in the cultural arena in 2021. This also provided an opportunity to identify new needs and dynamics to which culture and participation represented an effective response. This in turn fostered strong connections with other Goals within Compagnia and other bodies within the Fondazione Compagnia di San Paolo Group.

Our work was guided by focusing projects on the strategic policy directions of the Missions, and introducing actions aimed at developing and consolidating organisations and initiatives. This involved our relationships with Compagnia's

co-governed bodies and strategic partners in various fields, as well as all calls for proposals and operational projects. The tool-kit set established in the MYPD provided many of the necessary tools.

The calls for proposals system was revised in 2021, resulting in the introduction of a multi-year perspective, division of the process into phases and closer attention to impact. Various lines of intervention were shared and coordinated with the main public institutions in the catchment area, both within the framework of agreements (Piedmont Regional Council, Turin Municipal Council and Genoa Municipal Council) and through ad hoc partnerships. Development programmes were launched with the leading cultural organisations in the catchment area, in many of which Compagnia is a partner, with a view to boosting their efficiency and local impact.

This was a major overhaul, and we extended and enhanced the definitions of culture on which we have been working and will continue to work. In terms of method, Compagnia opted to share this vision by various means (webinars, communities of practice, training, capacity-building, communication) aimed at improving the efficiency and effectiveness of cultural ecosystems, and their aptitude for collaboration.

# 1. Building Capacity to Attract Mission

## The building-blocks of the Mission's strategy

To generate value from recognised cultural identities by positioning them in such a way as to extend the cultural infrastructure of the organisations and foster an integrated relationship between the worlds of culture and tourism.

To enhance and showcase the artistic and cultural heritage located across the target areas to create opportunities for economic, social and cultural development.

To support cultural planning and production irrespective of gender differences and encourage cultural and pioneering research.

To consolidate the reference role of the production and research entities that make up the recognised platforms of cultural identities.

To support the digital transformation of the cultural sector by means of multi-year innovation plans for the bodies concerned, in order to foster the development of their innovation culture and skills, improve their sustainability and increase levels of hybridisation with the technology sector.

In 2021, the Mission re-designed its tools for enhancing and showcasing scattered-site artistic and cultural heritage and for creative and artistic planning and production in Piedmont, Liguria and Valle d'Aosta. This spawned the In Luce and Viva calls for proposals (worth €1,500,000 and €548,000 respectively). The former is aimed at supporting cultural projects with an impact on sustainable cultural tourism, while the latter is aimed at funding summertime cultural offering in the three regions. The Art-waves call for proposals (€2,040,000) addressed the creative vocation of local communities through innovative, attractive cultural projects across the three regions, with a view to fostering a production, planning and distribution chain. The Mission supported 23 projects in the planning line and 15 projects in the production line for the first phase of the call.

Support for the contemporary creative sector was shaped by a detailed exchange of views on needs and strategies with the most significant players in the local ecosystem. Areas of interest were identified for each organisation, and capacity-building and empowerment pathways were then developed in line with the Mission's purposes and strategic design.

Fondazione Compagnia di San Paolo channelled considerable effort into the regionally important Piedmont cinema cluster in 2021. The aim of our intervention was to foster collaboration between the main players (first and foremost Museo del Cinema and Film Commission Torino Piemonte) and encourage the extension and positioning of the network.

The Wonder call for proposals (€2,400,000) was launched with the support of Circolo del Design and Torino Social Impact. It is aimed at designers and third-sector bodies intending to develop projects that make effective use of design to generate innovative solutions and services to meet social needs, while responding to the challenges of cohesion and the green transition. Under the Switch call for proposals (€1,706,640), Compagnia supported nine multi-year digital innovation plans relating to major cultural bodies in Piedmont and Liguria. These were accompanied by monitoring in collaboration with Fondazione Links and an evaluation plan produced in conjunction with the Observatory of Digital Innovation in Cultural Activities and Cultural Heritage of the Polytechnic University of Milan.

## The "VIVA" call for proposals, aimed at supporting the summertime cultural offering in the catchment area

Designed to support the summertime artistic and cultural offering in Piedmont, Liguria and Valle d'Aosta, the "Viva" call for proposals was one of the Culture Goal's responses to crisis in the cultural sector caused by the lingering Covid 19 pandemic. A grant of 548,000 euros was awarded to support initiatives aimed at producing cultural assets and initiatives and generating value from their use. Cultural visits and tourism were therefore encouraged by the enhanced affordability of the offering, and models were developed to increase the impact of the resources provided for the projects.

A total of 367 projects proposals were received, of which 28 were selected: 22 in Piedmont, 4 in Liguria and 2 supra-regional. The selection procedure gave priority to proposals capable of generating value from cultural and landscape heritage assets and kick-starting development mechanisms and local networks. The selected projects proved to be highly effective at promoting tourism and cultural visits by identifying specific target groups, especially young people and vulnerable social groups. They achieved this by offering vouchers for free or reduced-rate access to initiatives, and creating package tours and partnerships with hotels, restaurants and transport companies. Many initiatives involved artists under the age of 35, such as the Mirabilia International Circus & Performing Arts Festival 2021 in Piedmont or the "Nuove Terre - Le Arti della Scena" festival in Liguria.

Value of allocation  
**€548,000**

## The "In Luce" call for proposals, aimed at showcasing and generating value from the cultural identities of local areas

Compagnia launched the "In Luce" call for proposals to provide a new channel to help enhance and showcase scattered-site cultural heritage in Piedmont, Liguria and Valle d'Aosta. This call for proposals comprises two phases, relates to the three-year period 2021 to 2023 and is aimed at groupings of entities. Its purpose is to develop cultural capacity to attract as a means of fostering sustainable tourism, by first drawing up a long-term local cultural enhancement plan for each project. In phase 1, which required a multi-year plan to generate value from a proven "local cultural identity" and an initial project to implement it, 21 projects were selected across the three regions, with total funding of €1,500,000.

The selected projects stand out for their ability to fully interpret the local identities concerned, cover a multi-year period and involve well structured partnerships with clearly defined governance and a variety of actors. An empowerment process for the selected projects will get under way in the spring of 2022. Its aim is to boost the skills of the participating bodies ahead of phase 2 of the call for proposals, in which applicants must submit a project that develops and implements the content of the Multi-Year Enhancement Plan.

Value of allocation  
**€1,500,000**

# Developing Skills Mission

## The building-blocks of the Mission's strategy

To develop initiatives that promote the leading role played by cultural experience in the dissemination of educational communities and multi-dimensional learning contexts, with cultural bodies as value generators.

To develop initiatives aimed at supporting young artists and creative talents in building their professional skills and embarking on career paths.

To promote a composite, interconnected training and incubation system, based on co-responsibility between academies, institutions, independent entities and training providers specialising in artistic/creative, cultural and auxiliary cultural design skills, that meets all of the field's requirements.

To kick-start initiatives aimed at making cultural actors more sustainable, interconnected, consistent with their strategic planning and capable of recognising, fostering and embracing the dynamism shown by more advanced, and often flexible and innovative, professionals and entities.

Firstly, 2021 saw the continuation of funding for established projects such as Nati per Leggere Piemonte (€362,000), which encourages the habit of reading aloud in families with children from conception to 6 years of age, as a practice that has been proven to have positive effects on cognitive and relational development. The Mission supported 17 projects, which are implemented by networks encompassing health, education and library facilities and cover more than 400 municipalities in Piedmont. Thanks to a rigorous process of evaluation, 2021 paved the way for a review and relaunch of the project, which is partnered by Piedmont Regional Council.

Other initiatives aimed at young people included our work with La Bella Stagione (€219,000) on the 2021 programme. "Un'Estate Insieme" coordinated by the Educating for Collective Development Mission and aimed at offering summer opportunities to under-18s during the Covid pandemic. We also launched a new project, called "Consonanze" (with an allocation of €200,000 in 2021) in conjunction with Fondazione per la Scuola, aimed at introducing active musical experience into primary schools as a tool for developing curricular and cross-cutting skills. The initial preparatory work was carried out in 2021. This involved mapping non-profit providers of musical education in Piedmont and Valle d'Aosta, in order to find out more about the sector and identify project partners.

On the professionalisation front, the Performing+ initiative (€325,000) was brought to a close, at the same time as efforts were stepped up to support the Hangar Piemonte project (€150,000 in total), which is an integrated programme of training, professional mentoring, awareness-raising and networking designed for cultural bodies in Piedmont. The investment is based on collaboration with Fondazione Piemonte dal Vivo, which has been extended from Performing+ to a general strategic consensus on the need to boost the skills of cultural organisations. Since cultural work plays a central role in its strategies, the Mission mapped the cultural professions (especially emerging professions) and training opportunities associated with them in Piedmont, Liguria and Valle d'Aosta in 2021. Conducted by Cles srl and Associazione per l'Economia della Cultura, the study provided a comprehensive and nuanced picture, showing both the fragility and the potential of the sector (€60,000). In order to boost the professions, it is essential to work on training. That is why we supported 11 training and mentoring projects for artists and creatives in 2021 (for a total of €397,000), in the form of residences, masterclasses and specialisation courses in music, visual arts and animation.

## La Bella Stagione 2021

As part of the Fondazione Compagnia di San Paolo Group programme "2021. Un'Estate Insieme", the Developing Skills Mission, in conjunction with the Educating for Collective Development Mission and Consorzio Xkè? ZeroTredici, produced La Bella Stagione in 2021, featuring over 100 educational, play-based and creative activities, offered by 52 cultural bodies, in the field of science, environmental education and local-area promotion, to schools and summer groups in Turin. The aim of the project was to extend the opportunities available to children and young people and help them rebuild their relationships and explore their local area. The programme was also designed to strengthen the alliance between cultural bodies, schools and third-sector actors, thereby fostering an educational community. A further aim was to encourage visits to places of culture by families, especially after the end of the summer programme. The project was implemented in conjunction with Associazione Abbonamento Musei, which donated 9,245 junior subscriptions to children aged 6 to 13 across 100 summer groups, comprising summer camps, oratories, groups from the "Sam non va in vacanza" project and students from 93 classes. There was a total of 18,972 admissions from May to October, not including visits by families after the summer, which will remain possible until June 2022. These are significant numbers, attributable to a project funded by the Developing Skills and Educating for Collective Development Missions in the amount of €219,416.66.

Value of allocation  
**€219,000**  
of which **€129,000** from the **Developing Skills Mission**

## Performing+

The Performing+ programme came to an end on 18 November 2021. This was a three-year capacity building programme for over 112 live performance organisations in Piedmont, Liguria and Valle d'Aosta, undertaken in conjunction with Osservatorio Culturale del Piemonte. Its aim was to complement economic support with an internal growth pathway for organisations, aimed at fostering socially responsible management and organisation and a strategic orientation towards sustainable development. A total of €325,000 were invested in the project, €150,000 euros of which funded activities carried out in 2021. Over 150 hours of lessons, 9 workshop days and 1 environmental sustainability action lab were carried out in the last year, resulting in a positioning and commitment manifesto. Guidance was given to 10 organisations to help them each draw up a Social Report, and a permanent on-line tool-kit was produced, covering principles, methodologies and tools designed to encourage sustainable operating models: <https://performingplus.it/>. The monitoring process confirmed that Performing+ helped strengthen the strategic planning, sustainability, efficiency and robustness of the organisations involved. It also helped them cope with the pressure of the pandemic and prepare for the challenges of the National Recovery and Resilience Plan. In view of its success, the project will be launched again, and in 2022 will incorporate the Hangar project by Fondazione Piemonte dal Vivo, with Hangar+.

Value of allocation  
**€325,000**  
of which **€150,000** to support activities carried out in **2021**

# Preserving Beauty Mission

## The building-blocks of the Mission's strategy

To play a proactive role in fostering dialogue between the institutions in order to promote strategic use of the available resources through agreements, conventions and the innovative use of all regulatory instruments.

To promote a culture of maintenance of cultural heritage, based on research and design, which takes priority over emergency restoration, and facilitates planning, at least in the medium term, for sustainable heritage management.

To promote the development of the local area by harnessing the value of its landscape, starting from the most advanced regulatory instruments, such as the Piedmont Regional Landscape Plan, and using it as a testing ground.

To take a proactive approach to coordinating system-oriented actions aimed at managing archive assets and research libraries.

The Mission supported 32 initiatives to restore and upgrade cultural heritage sites (€3,370,785) in accordance with the criteria set down in the MYPD 2021-24, namely coordination with the relevant local institutions, promotion of a culture of scheduled maintenance and evaluation of priorities in terms of urgency. The interventions involved strategic sites in the historic centres of Turin and Genoa (including the Church of San Filippo Neri and the Albergo dei Poveri) and across the whole of Liguria and Piedmont (including the completion of the Santuario di Oropa).

A new line of intervention got under way in 2021, which makes use of the "leverage" defined in the Strategic Plan, by helping organisations benefit from the "Facades Bonus", which offers tax relief on the restoration of the facades of buildings, which in Compagnia's case are listed buildings. Under the initiative, Fondazione Compagnia di San Paolo supported three organisations in Liguria and two in Piedmont, by bearing the cost of the share not covered by the tax rebate, and covering the financial costs arising from the transfer of credit (€350,000).

Road-testing continued on the project to offer guidance on implementing the Regional Landscape Plan (Piedmont) aimed at local sustainable development based on the intrinsic values of the landscape concerned. The test method involved formalising the partnership between the Ministry of Cultural Heritage and Activities, Piedmont Regional Council and Compagnia di San Paolo in a written agreement. After a first phase focused on the area surrounding Ivrea, the second phase got under way in 2021, this time focusing on the Alta Langa.

## PRIMA call for proposals (encompassing prevention, research, investigation, maintenance and listening in relation to cultural heritage)

PRIMA, which saw the result of its first edition in 2021, is a two-phase call for proposals designed to pursue one of the main objectives of the Preserving Beauty Mission, namely to promote a culture of planned maintenance as opposed to emergency response. To achieve this objective, the practice of restoration needs to be re-interpreted as a project commitment designed - with the aid of scientific and technological research and rigorous economic planning - to put in place scheduled processes of heritage conservation and maintenance work. Ten preventive conservation and scheduled maintenance projects were selected under the call for proposals and awarded total funding of €2,168,000. The call for proposals also provides the winning organisations with training programmes delivered in partnership with the Centro Conservazione e Restauro "La Venaria Reale", the R3C inter-departmental centre of the Polytechnic University of Turin and the Archaeology, Fine Arts and Landscape Superintendence of the Metropolitan City of Turin.

Value of allocation  
**€2,168,000**

## Project for the coordination and development of archive support work

Launched in 2021, the project has been awarded a total of €120,000 to support the archive system, and should be read in relation to the MYPD 2021-24. It envisages coordinated, networked actions and initiatives designed to help manage archival and library assets more effectively, and make more productive use of them, along the lines set down in the National Recovery and Resilience Plan in relation to digitalisation, innovation, competitiveness and culture. These goals can be achieved by developing service networks and making innovations on the technological front. In the catchment area, however, a trigger moment was needed, and the project provided this. The actions related to the specialist fields of Fondazione 1563 per l'Arte e la Cultura, one of Compagnia di San Paolo's auxiliary bodies, which took part in them. Fondazione 1563 was tasked with establishing a technical committee made up of the leading local organisations responsible for archives and libraries, with a view to identifying priorities and agreeing upon subsequent system-oriented actions.

Value of allocation  
**€120,000**

# Encouraging Active Participation Mission

## The building-blocks of the Mission's strategy

To develop alliances and a corresponding network with strategic entities whose mission includes helping people take part in collective life and supporting some of them through the phase of change and empowerment, in order to enhance their ability to represent and act on behalf of the local area, in initiatives that are consistent with the Mission.

To harness the value of cultural and civic centres by identifying the junction points of this potentially dense network of new cultural centres, independent cultural centres and civic assembly centres in North-West Italy, in order to optimise outstanding strengths and antennae in the local area and launch development programmes for those that show signs of potential.

To develop initiatives aimed at encouraging the inclusive use of public spaces intended for the well-being of the inhabitants of the areas in which they are located.

To support second-tier entities operating within the four areas of participation identified as cases of both integrated co-management and the exercise of democratic practice; to facilitate their efficient growth, including with a view to developing tools for replicating the project designs and good practices developed in this context.

To identify, test, evaluate and scale up actions and centres in the identified areas and specific ad hoc projects; to develop systemic empowerment initiatives and experiences that foster meetings and projects involving cross-overs between sectors, skills, approaches and disciplines of knowledge.

To integrate the points deriving from the previous strategic policy directions – for local ecosystems and specific priorities for urban, provincial and internal areas – into a system to guide future policies.

The Mission introduced the operational concept of Strategic Allies in 2021, which refers to a group of preferred organisations with which to work for the purpose of fostering active participation in different cultural experiences. A three-year enhancement and development programme got under way with eight such organisations, on the assumption that boosting their organisational capabilities will make a significant contribution to achieving Compagnia's goals in the cultural arena, as set out in the MYPD 2021-24. (€ 1.465.000) At the same time, 100 cultural participation spaces/centres in the provinces of Piedmont, Liguria and Valle d'Aosta were identified as a result of the three-year "Space" call for proposals (€1,500,000), which is a systematic development of the emergency "Rincontriamoci" call for proposals published in 2020, two weeks after the start of the first lockdown.

Democratic participation is one of the new lines of intervention designed to encourage active participation by young people. The various actions undertaken in 2021 included the first year of the NextGenU project (€170,000), which is designed to raise awareness among under-25s of EU policies, the EU as an institution and its impact on the lives of citizens. The project saw the involvement of about 100 young people and 14 cultural and civic centres in North-West Italy in a series of active participation events. The G20 Global Games project (€160,000) introduced people under the age of 30 to international politics, and saw the participation of over 2000 young people from Turin and Genoa. The civic participation line mainly involved second-tier bodies, while also encouraging the formalisation of networks (Tavolo del Riuso, Orme, network of spaces next to schools) for the purpose of optimising their efficiency and hence the impact of

collaborative practices, which have a long history in the Turin area (€320,000). We also supported several very important individual initiatives and promoted the TorinoProxima call for proposals to help guide civic and cultural projects towards the creation of social-impact enterprise.

The relationship between science and society as a social and cultural dimension saw Compagnia taking action by coordinating with strategic allies, think-tanks and networks (such as the Sistema Scienza Piemonte); the Mission promoted projects on gender-equality in science, including Coding Girls (€77,000), designed to foster an interest in coding languages and information technology among secondary-school girls, and Io Scelgo STEM (I Choose STEM) (€50,000), to raise awareness of the opportunities for women to study and build careers in science and technology.

A project was also launched by Libera APS, aimed at training and dissemination regarding real estate confiscated from organised crime (€70,000), in conjunction with the national agency for the administration and allocation of property seized from organised crime, the Prefecture of Turin and ANCI.

The WELL Impact project, on the relationship between culture and health, also went into development in 2021, with four pilot projects in Turin, Vercelli, Genoa and Alessandria and the first workshops in the areas concerned. Places of culture and health, and participation in /exposure to cultural and health activities are the subject of the four pilot projects involving social, cultural and health operators and citizens and evaluators (€400,000).

### SDGs covered

### SPACE call for proposals - “Spazi di Partecipazione Al Centro”

SPACE - “Spazi di Partecipazione Al Centro” is a three-year project spawned by the economic crisis faced by places of participation and the relational crisis faced by people as a result of the pandemic. In the wake of the health emergency, it was converted into an initiative under the active participation strategic line. New cultural centres, independent cultural centres and civic aggregation centres constitute a sector of civic value because of the collaborative practices that they trigger, and also a sector of cultural value (99 of the 100 selected centres reported that they produce and circulate culture, “zero-miles culture” and neighbourly support culture that flies under the radar of normal surveys of cultural participation).

They are mostly micro-enterprises capable of generating economic and other value, in return for zero or very low institutional funding. In many cases, their operators have invested their own resources in publicly useful businesses, often involving public assets. Closing these centres would adversely affect both organizers and relationships within communities and collective undertakings.

The results were published in April 2021: There were 100 “socio-cultural centres” scattered across every province of the Piedmont, Liguria and Valle d’Aosta regions, which gained access to the three-year support programme that also includes the creation of a community of practice among social managers/entrepreneurs, with a commitment from Fondazione Compagnia di San Paolo of one and a half million euros for 2021 alone. An analysis of the results shows that:

- 2 out of 3 centres were founded after 2000;
- over the past 5 years, private individuals (or groups thereof) invested a total of 9.3 million euros in spaces of this kind;
- in 2020, the centres incurred costs of 4.3 million euros and reported a loss of earnings amounting to 6.3 million euros;
- 1 out of 4 centres has at least one member of its top management aged under-35.

Value of allocation  
€1,500,000

### The Mission’s strategic allies: enhancement and transformation plans

One of the Encouraging Active Participation Mission’s five strategic lines for the four-year period 2021-24 is to map all cultural stakeholders, keep an up-to-date record of them and identify a group of “Strategic Allies”, within the ecosystem, to boost as innovators and with which to form a network. Chosen for their consistency with these aims, the significance of their work on one or more of the Mission’s objectives, and their influence on other stakeholders, these are organisations with which significant operational methodologies and projects are co-built. As well as supporting their annual work for a time limited to the duration of the MYPD 2021-24, Fondazione Compagnia di San Paolo also organised a consulting service to help the bodies concerned develop their management and innovative capabilities by means of a three-year plan. This development was designed in 2021 thanks in part to the input of outside consultants who helped each organisation gain a clearer understanding of its characteristics and make maximum use of its potential.

Value of allocation  
€1,465,000

### Lead auxiliary body: Fondazione 1563

In line with the new strategic plan, Fondazione 1563 stepped up the role it plays in implementing Compagnia’s programmes in 2021, both in humanist research and in work relating to archives, by launching projects for the Compagnia Group and developing initiatives for the catchment area, in conjunction with the Culture Goal. The first edition of the “Turin Humanities Programme” got under way in 2021. Providing scholarships in Global History, it enhances Turin’s role as a vital and attractive place for humanist research.

Value of allocation  
€2,200,000

Goals and  
Missions

# People Goal

- 5 Reinventing dwelling systems and regenerating neighbourhoods
- 6 Promoting decent work
- 7 Educating for collective development
- 8 Rediscovering community
- 9 Working together for inclusion

## The People Goal and its Missions

Two factors characterised the context in which the People Goal operated in 2021. The first was the persistence of the pandemic and an accelerating rise in economic, educational and social inequalities. Worrying phenomena, such as the psychological malaise of entire segments of the population, particularly the youngest, and a widespread sense of isolation, fatigue and uncertainty about the future were the order of the day. The second, by contrast, was the emergence of encouraging dynamics as a specific result of the pandemic. These included increased civic activism, often on the part of young people; unexpected forms of resilience on the part of organised civil society, which had grown more aware of the benefits of collaboration; highly proactive educational communities; and increased dynamism on the part of young people, people from migrant backgrounds and public institutions committed to making effective use of the resources made available by European and national programmes.

Initiatives launched by the Goal in late 2020 were fully implemented, thus providing responses designed to reduce the effects of the pandemic on food poverty, the unaffordability of essential goods, educational inequalities, mental distress, increased marginalisation and a labour market that was inaccessible to young people not in employment, education or training (NEET), women with dependent children and vulnerable people. 2021 also saw

the implementation of projects directly conceived and promoted by groups of young people that Compagnia chose to assist, by continuing to invest in their dynamism, independence and empowerment.

The community played a pivotal role in our work, as the primary facilitator of human relations and a vital hub for building social capital and channelling its resources into combating poverty in all its forms, especially through neighbourly support action. The supported interventions facilitated the development and consolidation of broad partnerships between actors operating on a territorial basis. Increasingly, these partnerships proved to be innovative and effective welfare systems, characterised by an integrated approach to tackling social and educational issues that overcame the intrinsic limitations of sector-specific interventions organised according to excessively vertical models. Fondazione Compagnia di San Paolo also adopted new tools to fulfil its subsidiary role in relation to public policies in 2021. At a time when many organisations – public bodies first and foremost – were receiving substantial resources, Fondazione Compagnia di San Paolo launched initiatives aimed at upgrading their design and management capabilities, with a view to acting as a partner and taking a broad, multi-disciplinary view of projects, while focusing closely on impact and sustainability.

# Reinventing Dwelling Systems and Regenerating Neighbourhoods Mission

## The building-blocks of the Mission's strategy

To explore ways of promoting urban regeneration initiatives where dwelling is combined with infrastructure, logistics, employment, community interaction and socio-cultural considerations to ensure social inclusion and have a positive social, economic and environmental impact on parts of the catchment area.

To formulate, in collaboration with other Missions where appropriate, initiatives aimed at promoting environmental sustainability in urban areas (from measures to combat energy poverty to the dissemination of energy efficiency models, the use of specific tool-kits and a focus on urban green spaces and urban forestation).

To continue to support active housing services (temporary accommodation, social condominiums, social housing agencies, social co-housing projects, etc.) aimed at developing the social, dwelling and relational skills of the beneficiaries, in response to their specific needs.

To strengthen an innovative, collaborative social housing culture, by promoting the dissemination of models, research, analysis and experiences through seminars, publications, subject-specific reports, etc.

To strive to connect local entities and initiatives with regional, national and European resources, with a view to scaling up the capacity of local areas through hands-on support and/or co-funding actions.

To develop systems of scattered-site social housing supply - using vacant private housing stock or stock available to the third sector, non-performing loans, and dwelling units for sale by court auction - in order to increase the availability of affordable housing through economically sustainable and socially inclusive models.

### SDGs covered

## Social Co-Dwelling Units for Young People

These units are small communities of about 70 young people aged between 18 and 35, living together temporarily in public residential building complexes in Turin, in exchange for a reduced rent and approximately 10 hours of voluntary work to support the community of residents by organising activities and taking care of the communal spaces. The seven long-standing co-dwelling units were complemented with two new units in 2021, one geared towards artistic activities, in Via Cigna, and one with a focus on green issues, in Via Fossata.

■ Value of allocation  
**€79,500**

## Luoghi Comuni

Fondazione Compagnia di San Paolo submitted the "Residenze Temporanee Luoghi Comuni" project as a candidate for the New European Bauhaus Prize and it was selected as one of the 60 finalists out of more than 2,000 projects from all over Europe.

Luoghi Comuni Porta Palazzo was later chosen as the subject of a docu-film for the Building Communities series, produced by BBC Story Works, and presented by Housing Europe as a model of social housing that gives people new opportunities to build fresh visions of the future.

■ Value of allocation  
**€27,000**

## New hospitality and assembly centres

Fondazione Compagnia di San Paolo supported the construction of two new social housing facilities in Turin in 2021 with a total investment of €895,000.

Both are socially and functionally mixed and are intended to meet housing needs at the same time as redeveloping urban areas and revitalising the local social context.

Ma.Ri. House is a temporary residence for students, workers and families, with a particular emphasis on social vulnerability, promoted by the association Insieme per Accogliere Onlus and managed by Synergica scs. As well as being a social housing residence surrounded by 5,000 square metres of green space, it is a place that complements and interacts with the local community to which it belongs, whose quality of individual and collective life it aspires to enhance by means of services and opportunities for citizens. Ma.Ri. House accommodates up to 65 people in furnished single and double rooms with bathrooms, and also has communal areas for receiving guests. The residence was opened in June 2021.

Cascina Filanda was a derelict building at the entrance to Parco Meisino, which has been restored and re-purposed to accommodate an open, inclusive community.

Managed by Coabitare, a social enterprise, it comprises 15 studio apartments, 14 double rooms and a dwelling unit for the facility manager. It accommodates a total of 58 people and is equipped with communal areas for cultural activities and gatherings, and an outdoor area of 3,000 square metres. It also offers services for guests and for the district. The social mix is made up of people facing housing hardship, city users and occasional visitors. It also fulfils a variety of functions, including social housing, tourist accommodation, conference-room rental and services for citizens. The residence was opened in December 2021.

■ Value of allocation  
**€895,000**

### The “Prospettive Urbane” call for proposals relating to feasibility studies for urban regeneration

The aim of the call was to enable public bodies in the catchment area to carry out feasibility studies in preparation for the development of urban regeneration programmes aimed at enhancing, upgrading and taking care of the urban fabric, improving the quality of dwelling and day-to-day living, encouraging the economic development of the area, and promoting neighbourly support and community welfare actions.

Objectives:

- to improve local bodies' ability to design complex projects and acquire the resources to fund them;
- to reorganise, upgrade and increase the building stock available for the provision of social housing and social and cultural services;
- to upgrade the urban environment by enhancing the connections between housing facilities, public spaces and services in order to improve their safety and accessibility;
- to avoid further land consumption by giving preference to the redevelopment of urbanised, disused and degraded areas
- to encourage the recovery and redevelopment of buildings, including large sites or disused complexes, upgrade their energy efficiency and implement city services;
- to promote environmental sustainability (green and blue infrastructure, sustainable mobility, use of green materials and technologies, etc.);
- to promote community development, social inclusion, community welfare and civic participation by means of social mentoring.

The call for proposals was designed to act as a gateway for access to various forms of funding for local regeneration, in which the Foundation acts as a development agent whose resources have the potential to multiply their impact by attracting additional resources.

Beneficiaries: 14 municipalities in Piedmont and Liguria.

Value of allocation  
€1,192,000

6.

# Promoting Decent Work Mission

## The building-blocks of the Mission's strategy

To enhance the employability of people in situations of vulnerability or at risk of vulnerability, by continuing existing interventions and introducing new experimental initiatives that offer more innovative and efficient active employment policy solutions for vulnerable target groups than have been implemented by public authorities or other local actors.

To teach, develop, recognise and enhance the present and future key work skills of beneficiaries of the initiatives, while also making those skills transferable and consolidating the beneficiaries' personal and professional resources, so as to help them find and keep work and cope with potentially complex transitions.

To promote interventions to combat poverty and enhance employability and to support social inclusion by means of an integrated, multidimensional response, both on the economic front (employability and employment policies) and on the social and educational front (capacity building, combating housing hardship, access to services, including conciliation, and family and relational vulnerability).

To facilitate the construction and reinforcement of synergies, alliances and local systems between public and private employers and actors from the social and solidarity economy in order to develop new, more effective active employment policy instruments, aimed in particular at people in situations of vulnerability or at risk of vulnerability, by integrating rather than duplicating skills and interventions, disseminating and making productive use of knowledge to interpret the challenges of the employment market more clearly, and encouraging discussion and debate on these issues.

### SDGs covered

## Integro

In 2021 Compagnia continued its commitment to adults (over the age of 29) seeking employment. The INTEGRO initiative has completed the mentoring process launched in 2019 for 200 people with complex needs, for whom a multi-dimensional approach was taken to build pathways to socio-economic independence by focusing on active job-seeking, housing and social relations.

Value of allocation  
€2,683,288

## Initiatives relating to employment and disability

By supporting the project Il Mio Posto Del Mondo, Compagnia helped boost the employment opportunities of 11 young people with disability levels of more than 46% in the 19-29 age group and consolidate the application of an innovative model of managing the job placement process by promoting the tools made available by welfare-to-work policies and organising them into a system.

Value of allocation  
€60,000

## Vocational mobility training

The guidance and skills-building actions aimed at paving the way to employment reached 229 adults (over the age of 29), including 30 single women with school-age children, 27 foreigners with housing problems and 14 people over the age of 58. A total of 72 hours of specialist training were provided, leading to the opening of 46 traineeships and 70 employment contracts (data for the first 9 months of the project).

Value of allocation  
€800,200

## Interventions for the benefit of people serving custodial and non-custodial sentences for criminal convictions

In 2021, Compagnia helped equip 67 women serving custodial sentences to obtain employment by providing training designed to upgrade skills and boost employability (LEI Projects) and using the organisational structure of seven social cooperatives that work with prisoners. The cooperatives involved are all of different size, employ widely varying numbers of staff and have different histories (pilot project designed to strengthen the prison economy).

Value of allocation  
€179,000

## Migliora2

2021 saw the completion of the capacity-building programme for public, non-profit and for-profit bodies engaged in matching job-seekers with vacancies. Using peer-to-peer learning, the programme facilitated the exchange of tools and strategies to counter the Refugee Gap and strengthen networks that help refugees into the job market. Four training modules were held for a total of nine meetings (30 participants on average) and a national seminar (232 participants).

Value of allocation  
€132,000

## CUP - Convicts Upskilling Pathway Project

The CUP project presented by Compagnia di San Paolo in its capacity as lead organisation, in the 2019 Erasmus+ call for proposals funded by the European Commission, took second place in the Italian league table. The overall aim of CUP is to improve the medium-to-long-term employment prospects of men and women serving custodial sentences in Europe, by providing tools to measure and assess the benefits and impact of training courses, in order to develop pathways to get prisoners back into employment at the end of their sentences. The initiative also makes strategic use of advocacy to help raise awareness of prison-related issues and promote a new narrative that views prison as a place for training and enhancing the skills of individuals.

Work continued in 2021 on developing and testing innovative training modules based on technical, cross-cutting and basic skills, which involved prisoners and prison staff from six European prisons located in the initiative's four partner states, Italy, Cyprus, Greece and the Netherlands. The project involves 150 prisoners (100 men, 30 women and 20 young people) in seven training programmes. By extending strategic collaborations, the partnership intends to scale up the tools and methods it has tested and replicate them globally after completion of the project.

**Beneficiaries:** six prisons in four European countries (Italy, Cyprus, Greece and the Netherlands), 150 prisoners.

**Value of allocation:** the grant approved by the Erasmus+ programme is €449,616, of which 40.7% of the total project budget is allocated to Italian partners. Compagnia has approved an additional contribution of €50,000.

Value of allocation (Fondazione Compagnia di San Paolo)  
€50,000

## The Articolo+1 programme in other geographical areas

Articolo+1 is an active employment policy initiative for young people not in employment, education or training (NEET) launched by Fondazione Compagnia di San Paolo in 2016 in the Metropolitan City of Turin, with a view to increasing employment rates among people aged 15 to 29 with little or no work experience. The initiative was promoted in the Metropolitan City of Genoa in 2020, although activities did not start until 2021 due to the pandemic. Since its launch, the project has reached 270 young people and led to the opening of 98 traineeships and 58 contracts. The distinctive features of the interventions include their use of neighbourly support networks and social channels to engage people, the provision of support for short training courses co-designed with companies, and the integration of employment facilitation pathways with social and educational mentoring. Articolo+1 was also launched in the province of Verbano Cusio Ossola in 2021, thank to a partnership with Fondazione di Comunità del VCO and Fondazione Buon Lavoro. Compagnia di San Paolo transferred the work method and the necessary know-how to coordinate, promote and monitor the initiative to the two partner foundations. The initiative will become fully operational in 2022 and aims to involve 140 young people in employment and social empowerment programmes, and open 78 traineeships and 68 employment contracts.

**Beneficiaries:** Genoa - At least 468 young people not in employment, education or training (at least 141 of whom have taken up employment). VCO - At least 140 young people not in employment, education or training (at least 68 of whom have taken up employment).

**Value of allocation:** Articolo+1 Genova, approximately €1,000,000 (two-year intervention) and Articolo+1 VCO - €430,000 (two-year intervention) of which €230,000 euros were awarded by Compagnia.

Value of allocation (Fondazione Compagnia di San Paolo)  
€230,000

7.

# Educating for Collective Development Mission

## The building-blocks of the Mission's strategy

To road-test an effective, widespread hybrid educational model, which incorporates face-to-face teaching, use of digital media and formal and informal experiences, in a framework of reflection and strategic coordination, thereby making productive use of the skills available within the Compagnia system in synergy with local institutional actors, and taking a leadership position at national and international level.

To promote multi-dimensional, multi-actor experimental initiatives for competent, innovative, inclusive, high-quality educational ecosystems

To contribute to the development of cognitive, cultural, social, emotional and personal skills to develop the potential of young people, support continuous learning and proactively shape their future in a changing national and European context.

To promote leadership and dynamism among families and the younger generations.

To support initiatives of advocacy, value enhancement and capitalisation of early years and adolescence culture and practices, based on rigorous evidence and development processes.

### SDGs covered

## NOE - Nuovi Orizzonti Educativi

A three-year initiative promoted with Turin Municipal Council and Piedmont Regional Schools Office, District 6, in conjunction with Collegio Carlo Alberto and the University of Turin, to develop an educational community in the Barriera di Milano area between 36 entities (schools, third-sector bodies, local services and cultural institutions and associations) that co-design actions to enhance out-of-school activities and reduce the school drop-out rate. 70 actions; 100 children aged 0-6 and 130 parents; 450 children aged 6-13; 245 adolescents aged 14-18.

Value of allocation  
€467,000

## Diffusione Zerosei: a programme of actions designed to raise awareness of early childhood issues

The results of the Zerosei Programme and the guidance sessions given to bodies funded by the Fund to Combat Juvenile Educational Poverty in Piedmont and Liguria were used to produce guidelines, recommendations, tool-kits and calls for proposals across the catchment area. The aim is to support the consolidation of early-childhood culture and to nurture communities of practice and professionals as part of a broader collaboration in the development of communities of practice with children. Products created: Tool-kits and short videos on parenting in multi-ethnic families; Accompagnamento ZeroSei. Policy directions for early-childhood action; Accompagnamento ZeroSei call for ideas.

Value of allocation  
€160,000

## “Un’estate insieme”: from post-Covid project to established practice

Developed in conjunction with Fondazione Ufficio Pio, Fondazione per la Scuola and Consorzio Xkè? ZeroTredici, the programme combines well-established projects run in partnership with Turin City Council (“Estate Ragazzi”, summer activities run by Salesian and parish oratories, “CESM”, “Estate Xkè?”, “Estate Bimbi”) and new actions (“La Bella Stagione” and “Sam non va in vacanza”, the latter forming part of the inter-institutional initiative “Provaci ancora Sam!”). The challenge is to create a local alliance between the public administration, third-sector bodies, oratories, schools, cultural bodies, local participation centres and foundations, which can work in synergy to provide quality educational opportunities for children aged 6 to 14. In 2021 this was done in partnership with Associazione Piemonte Musei. The initiative led to the construction of an educational bridge linking term time with the summer holidays, to help overcome the adverse effects of the pandemic on children’s learning and socialisation in Turin. With an investment of €1,581,000, 35 participation centres, 24 museums, 34 schools, 17 providers of the Estate Ragazzi della Città di Torino programme and 40 oratories developed activities for around 7,000 children, equating to 11% of the population of Turin in this age group. Over 7,000 museum season tickets were issued, and the initiative saw the involvement of over 1,000 volunteers, 80% of whom were under the age of 30.

Value of allocation  
€1,182,000

## Famiglie ZeroSei

Strong relationships, solidarity and neighbourly support protect the well-being of people, families and communities, especially if they are vulnerable or at crucial life-stages, including early childhood. What is the most effective way of supporting active participation and the construction of informal networks between families with children aged 0-6 years? Ten bodies and institutions were invited to work with families to co-design a range of initiatives involving cultural, relational and social opportunities in the city. They comprised five museums and five bodies involved in the “La Bella Stagione” programme (Museo Egizio, Reggia di Venaria, Fondazione Sandretto Re Rebaudengo, GAM, Museo Lavazza, Associazione Theatrum Sabaudiae, Ente di Gestione Aree Protette del Po, Museo Arte Urbana, Circolo Banfo, Viaggi Solidali) and five ZeroSei venues (Spazio ZeroSei, the public baths in Via Agliè, Binaria Bimbi, the Gruppo Abele Drop House and Vides Main). The project partners are Turin City Council, the Piemonte Musei season ticket system and Rete Lilliput, which was involved in producing a kit to help people get the most out of the cultural experience independently. 100 families were involved, equating to about 20 for each Zerosei venue. The joint effort between the Educating for Collective Development Mission and the Developing Skills Mission, with the aid of Consorzio Xkè? ZeroTredici, the collaboration between museums, participation bodies and Zerosei venues is generating an increase in skills among operators, cross-pollination and new strategies to help empower families.

Value of allocation  
€92,000  
of which €62,000 from the **Educating for Collective Development Mission** and €30,000 from the **Developing Skills Mission** (Culture Goal)

8.

# Rediscovering Community Mission

## The building-blocks of the Mission's strategy

To introduce community health promotion initiatives that impact positively on the organisation of local services, in synergy with the measures implemented at public level.

To help strengthen the social capital of communities and combat the rising levels of poverty and inequality, by establishing neighbourly support networks.

To promote gift culture and the culture of solidarity by making more productive use of new and established forms of volunteering.

To help orchestrate local resources into a system by consolidating networks that include public institutions, the third sector and civil society in order to build multi-dimensional, multi-level responses aimed at people in situations of vulnerability.

## Rete Ricibo

A citizens' network project for the recovery and redistribution of food surpluses for the purposes of social solidarity in the Municipality of Genoa. The aim of the project in 2021 was to build an integrated ecosystem for a zero-waste city, by coordinating all parties that manage the recovery and redistribution of goods, thereby combining the fight against food waste with the fight against poverty.

■ Value of allocation  
**€65,000**

## Guidelines for supporting Community Foundations

An initiative aimed at 10 community foundations operating in North-West Italy (Piedmont, Liguria and Valle d'Aosta) through support for their activities, fund-raising campaigns to boost their results and actions to strengthen their capacity to generate economic resources, including in networks with other local organisations.

■ Value of allocation  
**€725,000**  
of which **€20,000** explicitly allocated to capacity building

## Distretto Sociale Barolo

A protocol of understanding covering Turin and Piedmont aimed at building an integrated social, cultural and health services cluster for people facing hardship: a full-blown citadel of human promotion, centred upon the heritage and tradition of the Opera Barolo. The synergies forged between the organisations involved have helped to reduce segmentation between the different targets and needs, and to promote generative welfare, by means of community involvement and dynamism.

■ **Beneficiaries:** 10,000 people per year.

■ Value of allocation  
**€ 50,000**

## Per aspera ad astra

An experimental initiative aimed at enhancing the use of theatre within the prison system, coordinated by ACRI and involving 13 Italian foundations. Carried out in 14 Italian prisons and involving some 250 prisoners per year, the project aims to forge a network encompassing the best practices and experiences across a range of locations in the catchment area, and to disseminate their approach. This is backed up by raising awareness of the effectiveness of theatre as a tool for personal development and enhancing the employability of prisoners, who are offered training for theatre-related jobs as part of the project.

■ Value of allocation  
**€110,000**

## Pluralità di cure

This operational project involving a network of organisations has provided a range of responses to the mental health needs of the immigrant population, with a view to reducing their distress or suffering. The partnership carries out specialist clinical, psychological and social interventions, training sessions aimed at strengthening the professional skills of social and health workers in their relationship with people from migrant backgrounds, and promoting access to social and health services for immigrants and their families through guidance and training.

■ Value of allocation  
**€260,000**

### SDGs covered

### “Salute, effetto comune” call for proposals

A two-year initiative through which Compagnia has continued and developed its commitment to the mental health of communities in the Piedmont region.

Compagnia used this call to support nine local networks made up of third-sector and public bodies (providers of social care services and/or local health trusts responsible for the areas in which the initiative was implemented). Special efforts have been made to boost the role played in these networks by associations of users of mental health services and their families, with a view to raising awareness of the rights of people with mental-health issues, mitigating isolation and facilitating a shift in the cultural paradigm towards the emancipation of people facing mental-health issues.

The initiatives supported involve people with experience of mental suffering in the construction and implementation of personalised projects focusing on three core needs – housing, training/employment and socialisation – based on the principles of inclusion and access to citizenship rights. The projects offer prevention and promotion activities relating to mental health, especially for teenagers and young adults.

Compagnia offers guidance programmes to the selected local networks and invests in public awareness-raising actions, with a view to promoting cultural change in the approach to mental health.

**Beneficiaries:** 9 local partnerships in Piedmont.

Value of allocation  
€1,000,000

### “B<sup>2</sup> = Il bene x bene” call for proposals

The aim of this call for proposals was to support initiatives designed to strengthen local networks for the recovery and redistribution of surpluses and donations of essential goods, first and foremost food, to people facing hardship.

The 11 initiatives supported in Piedmont and Liguria have involved municipal councils, third-sector bodies, providers of social care services and, in some cases, individual citizens organised into informal groups, reaching about 15,000 beneficiaries. Fondazione Compagnia di San Paolo provided practical support for the projects, involving training, the mapping and coordination of relevant local actors, and the presentation of platforms and apps for the exchange of goods and information.

Issued in the wake of previous Compagnia initiatives, the call for proposals harnessed the momentum generated by the Covid-19 emergency to coordinate local networks involved in combating food poverty and the unaffordability of essential goods with other support provided by public-service and third-sector bodies by means of local welfare hubs.

Compagnia di San Paolo’s periodic monitoring thus made it possible to observe the evolution of local teams spawned by the Covid-19 emergency in permanent coordination between local volunteering and municipal and social-care services; develop actions combining the fight against waste and the fight against poverty, especially among young people; set up solidarity emporiums to give people facing hardship freedom of choice in places where surpluses are redistributed; develop connections with local experiences in urban and social agriculture.

**Beneficiaries:** 11 local partnerships in Piedmont and Liguria.

Value of allocation  
€ 432,000

9.

# Working Together for Inclusion Mission

## The building-blocks of the Mission's strategy

To offer support, guidance and assistance to victims of crime, regardless of the type of crime in question and the subjective condition of the victim, with a specific emphasis on initiatives for women who fall victim to gender-based violence, by boosting the role of public bodies in this type of policy and service, and by eliciting initiatives of advocacy and promotion of a culture of crime victims' rights.

To empower young people and foster their independence, with a view to making them active protagonists and a recognised resource within society, and to build – alongside people who are most at risk or in situations of hardship, where appropriate – processes involving local entities, aimed at making young people drivers of change and hence citizens with a high level of awareness and strong sense of responsibility.

To support specific geographical areas for the networking of services and solutions for the basic and complex needs of vulnerable people and people at risk of marginalisation, especially from migrant backgrounds, in order to counter social exclusion in all its forms.

To increase the response capacity of entities and operators in the public service and private-sector social arena that interact with people from migrant backgrounds, to ensure that they all have access to locally available services and opportunities, by promoting inclusive processes that recognise and value the pathways of everyone concerned.

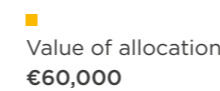

To continue local partnership initiatives between Northern and Southern regions of the world, in collaboration with specialist actors from our catchment area and with other foundations, involving support for processes that help boost the skills and knowledge that are instrumental to promoting sustainable development, through a multi-dimensional, multi-situated approach.

### SDGs covered

## Telefono rosa

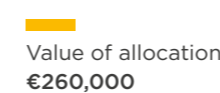

With its initiative encompassing accommodation, listening and support for female victims of violence or maltreatment, Associazione Telefono Rosa Piemonte offers legal advice, psychological support, a social and employment help-desk, accommodation in a centre for female victims of violence, and counselling for children under-18 who have witnessed or directly suffered violence. 744 female victims of violence received help from the project.

## YEPP - Youth Empowerment Partnership Programme

The YEPP project is based on a participatory programme intended to build active citizenship paths involving young people, change and innovate their role in communities and develop long-term projects that improve the quality of life of local communities, particularly among the young. YEPP is based on the “community development” approach and aims to develop: empowerment of young people and the community; partnerships between different entities (public, private, third sector) at all levels (local, regional, national and international); advocacy (influencing public policy so that the participation and empowerment of young people becomes a factor that shapes actions); learning (continuous training and skills transfer for all individuals involved in the project, whether young or old).

YEPP projects were run at 12 sites across 4 regions of Italy in 2021 thanks to Associazione Yepp Italia, which took part in 20 international partnerships, alongside the YEPP Europe centre in Berlin.

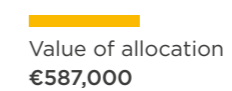

## Mosaico

The OASI: On the Street project, run by the association MOSAICO - Azioni per i Rifugiati in 2021, helped people in need or facing vulnerability in the wake of their migration, by listening and offering support and guidance on finding information and accessing the services made available by local authorities. The project reached 1,500 people and offered ongoing assistance to 700.

## Territori Inclusivi

This call for proposals is designed to develop and consolidate social protection networks aimed at people who are vulnerable and/or at risk of marginalisation, with a particular emphasis on people from migrant backgrounds. The initiatives that received funding also took action aimed at exchanging knowledge and changing the narrative around migration and inclusion, as an integral part of the consolidation of local networks. The project involved 13 selected public-private partnerships in Piedmont and Liguria.

## CUAMM Project

The goal of the project “Prima le Mamme e i bambini - Nutriamoli”, promoted by CUAMM, was to help improve the health of mothers and children in seven countries in Africa (Angola, Tanzania, Uganda, Ethiopia, Sierra Leone, South Sudan and Mozambique), by increasing access to and the quality of mother and baby, infant, neonatal and nutritional services. The initiative is supported in partnerships with other foundations. 65,025 women and 15,770 children received assistance; 1,836 community workers received training.

Value of allocation  
**€200,000**

## IN16159 - Ingegneria Naturalistica In Valpolcevera, Genova

Kids who want to turn the woods into a “home” for the community. A project selected under the GxG “Giovani per i Giovani” call for proposals, in whose first phase - the “Mind Club” call - an informal group of young people from Genoa, called “Tra gli alberi” (among the trees), proposed this original idea. It was then co-designed with COOPSSE, a social cooperative and the lead organisation, the local partners, namely Associazione “La Piuma” Onlus and the Cooperativa Sociale “Villa Perla Service”. This two-year project got under way in 2021.

The aim of the project was to provide a group of young people with education and training combined with the opportunity, tools and resources to carry out conservation and natural engineering work in the wooded uplands of Valpolcevera. The area features a network of trails that is subject to erosion, landslides, pollution and deterioration, which exacerbate subsidence and flooding in the event of rainfall, causing problems in downstream areas.

The project involved mapping the sites requiring remedial work, taking action to prevent hydro-geological subsidence, setting up two areas for use by local education authorities for outdoor educational activities, preventing environmental pollution, enhancing the general and specific skills and abilities of the participants, and promoting dynamism as a facilitator of well-being.

On completion of the project, the practical work carried out by young people will enable citizens to use the reclaimed spaces in the local area.

Value of allocation  
**€ 54,000**  
(co-funded with Fondazione Carige)

## MOI, Migrazione un’Opportunità di Inclusione

The 2017-2021 multi-year MOI project - Migrazione un’Opportunità di Inclusione - was promoted by Compagnia di San Paolo, Turin Municipal Council, the Prefecture of Turin, the Archdiocese of Turin, Piedmont Regional Council and the Metropolitan City of Turin. The aim of the project was to provide housing and employment opportunities for the occupants of the four buildings in the former Olympic village and to allow gradual use for residential purposes.

Over the course of four years, the aim of clearing the occupied area was achieved as a result of joint action by the project’s sponsors. In the first phase, people were gradually offered places in accommodation facilities under agreements with Turin City Council and the Archdiocese of Turin. About 20 accommodation facility management bodies were involved in the project, across some 60 locations. The project had 806 direct beneficiaries. The multi-disciplinary, inter-institutional team placed a strong emphasis on social inclusion, gave top priority to the specific needs of each individual and developed solutions to help people leave with the highest possible degree of independence. The project entered its final stage in 2021, against a backdrop complicated by the ongoing pandemic. From the start of the project to 31 December 2021, 753 training and guidance courses, 512 employment contracts and 390 traineeships were put in place.

As regards the tailored housing assistance programmes offered under the MOI project, 178 people achieved housing independence in 82 dwellings.

Value of allocation (over the 4 years)  
**€6,000,000**  
of which **€750,000** were awarded in 2021

## Auxiliary bodies involved: Fondazione per la Scuola, Ufficio Pio and Consorzio Xké ZeroTredici

Intensive collaboration with the People Goal’s auxiliary and co-governed bodies, such as Fondazione per la Scuola, Ufficio Pio and Consorzio Xké Zerotredici, yielded well planned and structured solutions to social and educational issues affecting our catchment area. Consolidated by field-testing and implementation, these solutions have become scalable practices and models ripe for replication and sharing with other institutions and policy-makers. Achieving this result was made possible by the aligned strategies of the Compagnia Group and effective use of the specific expertise of each of its member bodies.

Total value of allocation  
**€ 14,661,000**

Goals and  
Missions

# Planet Goal.

- 10 Harnessing the value of research
- 11 Boosting innovation
- 12 Promoting well-being
- 13 Fostering international opportunities
- 14 Protecting the environment

## The Planet Goal and its Missions

The common thread linking the Planet Goal's initiatives in 2021 was the development of Fondazione Compagnia di San Paolo's key stakeholders in the fields of social and environmental innovation, academic research, the health system and the international arena. The grants were mainly aimed at strengthening the organisations and their processes, thus boosting their competitiveness and their project design and delivery capacity. In line with the Foundation's strategic planning for 2021-2024, the main aim was therefore to prepare the ecosystem for the funding opportunities arising under ordinary European programmes (Horizon Europe, Social Economy Action Plan) and extraordinary programmes adopted at national and European level (National Recovery and Resilience Plan and Next Generation EU respectively).

With the launch of the Covid-19 vaccination campaign, Compagnia stepped up its efforts to tackle the pandemic and support the regional health system, by opening a vaccine hub in Turin in 2021, organised and funded by the Foundation in conjunction with Turin local health trust. We also supported projects designed to facilitate the innovation and digital transition of the health system with specific reference to remote health monitoring, the renovation of hospital departments, the upgrading of hospital equipment and the safety of staff and women.

To mitigate the impact of the post-pandemic environment on social-economy and third-sector actors, considerable effort went into initiatives designed to help consolidate the sector, through upskilling, digital innovation and strengthening strategic management.

In line with the national and European reference framework, the environmental challenge and the green transition were other key priorities in 2021: experimental initiatives relating to local adaptation to climate change, combating energy poverty and protecting the natural capital and biodiversity of the catchment area were launched with a view to enhancing Fondazione Compagnia di San Paolo's expertise in a field that did not become an explicit policy area until the publication of the MYPD 2021-24.

Considerable efforts were also directed towards the main universities with which Fondazione Compagnia di San Paolo works, to enhance their capacity to attract. Furthermore, the quality and reputation of North-West Italy's research system was a focus of targeted actions, which also embraced major international think-tanks. To complete the picture, 2021 saw a significant increase in synergies between the Mission's activities and those of three of Fondazione Compagnia di San Paolo's auxiliary bodies, namely Fondazione Collegio Carlo Alberto, Fondazione LINKS and the Italian Institute for Genomic Medicine.

# Harnessing the value of research Mission

## The building-blocks of the Mission's strategy

To support universities in European competition and foster the attraction and retention of talent by means of a variety of integrated actions.

To promote innovation in teaching in order to reduce the mismatch between skills learned and skills needed by the market.

To promote advanced strategies for managing and protecting the intellectual property generated by universities, and reaping value from it.

To ensure fair and inclusive education that brings out the best in every individual.

Supporting research by means of calls for proposals in line with European planning.

### SDGs covered

## “PoC Instrument” call for proposals

The PoC Instrument call for proposals helped universities to transition patented technologies or registered software from the initial development stage to usability in production. The aim of this was to reduce technological risk and facilitate the commercial exploitation of research, by setting up university spin-off companies where appropriate. The last of the five application deadlines specified in the call for proposals was reached in November 2021, resulting in the receipt of 122 applications for the development of proofs of concept. This call for proposals and its budget is covered by the agreements with Universities.

Value of allocation  
€1,600,000

## Agreements with Universities

The three-year agreements (2019-2021) with the University of Turin, the Polytechnic University of Turin, the University of Eastern Piedmont, the Federico II University of Naples and the University of Genoa expired in 2021 and negotiations are in progress for their renewal for the three-year period 2022-2024. Support for the university system placed a strong emphasis on the competitiveness of universities at the European level, innovation in approaches to learning, technology transfer activities and generating value from intellectual property.

The relationship with universities included the development of services, support for top-tier educational pathways and the enhancement of skills, the last of which was achieved through the award of scholarships in partnership with local bodies.

Value of allocation  
€11,900,000

### “Trapezio” call for proposals - Paving the way to research excellence and talent attraction

As regards support for research, in line with European planning and the new national research support instruments (such as the Italian Fund for Science), our actions (see *Intelligenza Artificiale* and *Trapezio - Paving the way to research excellence and talent traction*) have aimed to foster inter-disciplinary research and the development of European networks and partnerships, and to enable research bodies to attract, nurture and benefit from research talent.

Carried out in collaboration with the Promoting Well-Being Mission, the call for proposals was designed to serve two purposes: to train institutions in Piedmont and Liguria to compete in research funding programmes at European level, so as to boost their competitiveness, reputation and long-term economic sustainability; and to road-test a new way of supporting the best project proposals which, despite being assessed very positively at European level (receiving a Seal of Excellence, for example), were not awarded funding due to budget constraints, while at the same time attracting talented researchers to our country.

The call for proposals is divided into two lines of intervention. The first, designed to help the research system compete at European level, provides funding (from €50,000 to €150,000) for research projects which have been positively evaluated by an international funding body, but have not been financed due to a lack of funds. The resources granted may be used by the proposing bodies for actions to consolidate the scientific profiles of researchers internationally, to strengthen the scientific and cross-cutting skills of research staff, including design skills, and to promote international networking activities. The second line, designed to support the internationalisation of research institutions and the attraction of talent, offers holders of a Seal of Excellence (SoE) under the Marie Skłodowska-Curie Actions Programme a chance to develop their research project at a host institution in Piedmont or Liguria.

The call for proposals, aimed at research bodies, universities, cancer research and treatment centres (IRCCS) and hospital trusts in Piedmont and Liguria, has two deadlines - the first on 30 December 2021 and the second on 31 March 2023 - so as to include the largest possible number of competitive calls under the Horizon Europe programme.

---

Value of allocation  
**€3,600,000**  
of which **€1,800,000** drawn from 2021 funds  
of which **€1,300,000** from the **Harnessing the Value of Research Mission**  
and **€500,000** from the **Promoting Well-Being Mission**

### “Intelligenza Artificiale” call for proposals

The second edition of the call for proposals relating to artificial intelligence and its ethical, socially useful applications was launched in December in partnership with Fondazione CDP with a view to supporting innovative research projects aimed at advancing scientific knowledge in the field of artificial intelligence and generating economic and social benefits for the catchment area. The Foundations work together to promote and strengthen their commitment to scientific research, which they see as strategically important to the country and which is reflected in European initiatives such as the Digital Europe Programme, Horizon Europe and Next Generation EU.

The aim of the call for proposals is to investigate the opportunities that artificial intelligence opens up in four areas: Health and Well-being, Environment and Green Transition, Protection and Insurance Against Risks, Education and Training. The aim is to provoke thought and encourage the development of pilot projects that use artificial intelligence in the four fields identified. The projects must meet local needs and bring significant economic and, more especially, social benefits to the community. The proposed projects must therefore involve collecting data and carrying out analyses in the local area, road-testing innovative solutions and encouraging collaboration between universities, research bodies, businesses and the third sector.

The submission of projects is invited from partnerships comprising at least seven entities: one lead organisation, one evaluation body, two research and development partners and at least two local partners.

Four partnerships will be selected, one for each thematic strand, and an amount of up to €1,000,000 will be awarded to each. To take part in the call for proposals, an Expression of Interest must be submitted by 15 March 2022, followed by an application by 31 May 2022.

---

Value of allocation  
**€4,000,000**

### Lead auxiliary body: Fondazione Collegio Carlo Alberto

Fondazione Collegio Carlo Alberto, a research-oriented auxiliary body of Compagnia di San Paolo, co-governed by the University of Turin, is a research body whose object is to promote, manage and enhance research and higher education in the economic, political and social sciences and related disciplines. It is an international centre of expertise and helps the Harnessing the Value of Research Mission achieve its goals by means of training; attracting, nurturing and benefiting from the best researchers; and communicating with policy makers and society in the scientific and cultural fields it covers.

---

Value of allocation  
**€5,630,000**  
of which **€150,000** allocated from prior years

# 11. Boosting innovation Mission

## The building-blocks of the Mission's strategy

To promote actions aimed at consolidating the innovation ecosystem, by serving as a territorial hub within a framework of strategic public-private partnerships and by drawing the attention of policy-makers and the local community to European Commission initiatives aimed at innovation, and technology and skills transfer.

To promote actions to boost the resilience, renewal and efficiency of social-economy organisations and increase their impact, by initiating processes of development and organisational transformation, enhancing skills and supporting the formation of an entrepreneurial culture, in line with national measures and EU policies.

To support cultural training and acceleration actions aimed at empowering a new generation of impact-oriented

entrepreneurs and innovators, in collaboration with institutions, local actors and Italian universities, in line with innovative teaching and third-mission initiatives.

To promote interventions aimed at digital transformation and data management, by creating opportunities to connect technological/process innovation with collective action, so as to help organisations identify new ways of addressing the local area's needs and aggregating demand.

To consolidate the local skills system on the basis of initiatives and opportunities associated with innovation deriving from the European Commission that can foster local excellence as a building block in local development.

### SDGs covered

## “Wonder” call for proposals

The Wonder call for proposals set itself the goal of supporting innovation in the third sector, by encouraging the dissemination of knowledge, models and policies capable of generating necessary and positive changes for individuals and communities, while at the same time supporting the design sector, which is recognised as one of the defining features of the Turin system, with high potential for application and growth.

Value of allocation  
**€240,000**  
of which **€120,000** from the **Boosting Innovation Mission** and **€120,000** from the **Building Capacity to Attract Mission** (Culture Goal)

## “TorinoProxima” call for proposals

Developed in collaboration with SocialFare and ForwardTo, TorinoProxima is a multi-partner initiative designed to connect civic imagination projects relating to the future of Turin with cultural acceleration pathways intended to spawn new social-impact enterprise.

Value of allocation  
**€265,000**  
of which **€100,000** from the **Boosting Innovation Mission** and **€165,000** from the **Building Capacity to Attract Mission** (Culture Goal)

## Wecoop

The Wecoop project uses a board-game format to simulate the experience of an enterprise and its relationships with the community and the geographical area it operates in, drawing on the principles of the civil economy and the practical experiences of social enterprises. Thanks to a partnership between Fondazione Compagnia di San Paolo and the Scuola di Economia Civile, WeCoop was presented at the 2021 edition of Turin International Book Fair, where it was used by high-school students.

Value of allocation  
**€30,000**

## Borsa dell’Impatto Sociale

The “Borsa dell’Impatto Sociale”, or Social Impact Exchange, is an experimental project designed to create a capital market dedicated to businesses whose mission includes having a positive social impact. In the short term, the project aims to create “dedicated” variants of existing capital markets, and then to create a stand-alone segment in the medium term. The feasibility study was completed in 2021 and pilot enterprises were selected for the trial. Compagnia is a member of the Promoting Committee, consisting of sector experts, bodies and companies, which public and private actors can join.

Value of provision for the feasibility study  
**€90,000**  
of which **€50,000** from the **Boosting Innovation Mission**

### ESA Business Incubation Centre Turin

The Polytechnic University of Turin's Incubator I3P, the Polytechnic University of Turin and Fondazione LINKS won the selection of the European Space Agency for the construction and management of the new ESA Business Incubation Centre Turin, aimed at supporting the formation and growth of new Italian start-ups in the aerospace sector. The centre is a magnet for attracting high-potential start-ups, identified by means of three annual selections, that can put down roots and grow in our catchment area.

■ Value of allocation  
**€200,000**  
of which **€70,000** from the **Boosting Innovation Mission**

### Digital Open Badges for the Third Sector

Compagnia has launched an experiment with Digital Open Badges for the third sector in partnership with the University of Turin's LabNET SAA School of Management and Fondazione Accademia Maurizio Maggiora. The aim is to raise awareness of the instrument and its potential at system level. Digital Open Badges represent an innovative model for assessing skills, especially soft skills and other skills that are not certified by institutional education systems. They are digital awards, issued according to international standards, which are becoming widely used across Europe as a good practice for skills certification and validation, and which can therefore help people build professional CVs, incorporating experiences that are otherwise hard to attribute a measurable value to.

■ Value of allocation  
**€64,700**  
of which **€40,000** from the **Boosting Innovation Mission** and  
**€24,700** from the **Promoting Decent Work Mission**  
(People Goal)

## Vento - Venture Originator

Vento is a non-profit venture building programme designed, developed and managed by SEI School of Entrepreneurship & Innovation in Turin, supported by Exor and in partnership with Talent Garden and OGR Tech. Every year, it helps 10 teams bring scaleable tech companies to the market, in response to challenges issued by large companies. Each team is given a challenge, formulated by a grouping of large companies. Their task is to find a solution that can be turned into a fully fledged business with high development potential.

Candidates are selected entirely on the basis of their entrepreneurial potential, and they do not need to have an idea or a team to take part. The top candidates - undergraduate students, researchers, doctoral students and young people in employment - attend an individual interview and then take part in a five-day boot-camp to fully demonstrate their entrepreneurial potential. Once selected, the 30 aspiring entrepreneurs are split into 10 teams and take part in a 4-month full-time venture building programme, during which they are paid and helped to develop new innovative and scalable tech companies.

On the final Investor Day, the start-ups are presented to an audience of Italian and European angels, accelerators and venture capital funds, which can decide to invest in the newly formed companies, to further support their development.

The programme draws inspiration from the best venture builder models that are rapidly establishing themselves in the US and Europe: over the past seven years, the number of business creation organisations has increased by 625% and has been shown to bring major benefits for founders and investors alike (Source: Disrupting the Venture Landscape - GAN Accelerators).

Vento aims to minimise the failure rate of entrepreneurial ideas and to increase the growth potential of new businesses, by systematically selecting participants, setting up teams and researching the demand from which the company originates, with the support of Partner Companies. The challenges include creating new markets, targeting new customers, using existing technologies for new applications and leveraging new trends.

Vento does not take equity holdings in the start-ups it helps create, or success fees of any kind: it was founded with the support of the holding company Exor which, through Vento, is committed to supporting the entrepreneurial projects of talented young people as part of its ESG policy.

Fondazione Compagnia di San Paolo supports the start-ups formed during the programme, by providing the teams with the necessary funding to help produce prototypes/proofs of concept, as a necessary step in developing the nascent business.

Value of allocation  
**€250,000**

## “Rigenera” - financial innovation for the social economy

This three-year project promoted by Fondazione Compagnia di San Paolo and Fondazione Opes-Lcef is aimed at supporting cooperatives and social enterprises by facilitating their innovation, independence and economic sustainability, using the transformational power of patient and regenerative capital.

In its capacity as financial backer and partner, Opes provides economic support to third-sector production initiatives in the form of recoverable grants, so as to enable about 10 cooperatives and social enterprises to develop their business activities. In the event of a positive economic result, Opes has the option to request the return of the paid-up capital and to decide, alongside Compagnia, whether to put it at the disposal of other third-sector production companies.

As well as financial support, the selected social enterprises and cooperatives are provided with due diligence, pre- and post-investment mentoring, strategic guidance, managerial/organisational support and assistance with seeking capital, to help draw up and implement an industrial plan.

Kick-starting experimental projects therefore enables Compagnia to multiply the impact of resources, generate social impact, foster lasting improvements in efficiency and sustainability for the beneficiary bodies and deploy a pioneering tool from the tool-kit presented in the Multi-Year Planning Document 2021-2024.

Value of allocation  
**€230,000**

## Lead auxiliary body: Fondazione LINKS

Fondazione LINKS is an applied research centre founded by the Polytechnic University of Turin and Compagnia di San Paolo, which operates in applied research, innovation and technology transfer, bridging the gap between basic research and market-readiness.

In addition to its ordinary work, LINKS helps achieve Compagnia’s goals according to a three-pronged approach involving actions and interventions consistent with Compagnia’s strategies, initiatives serving the Goals and Missions, and initiatives serving the third-party bodies with which Compagnia has partnerships in place.

Value of allocation  
**€5,300,000**

## 12.

# Promoting Well-Being Mission

### The building-blocks of the Mission's strategy "Hospedal" call for proposals

To encourage organisational and management innovation, especially if associated with a technological dimension.

To focus of interventions, including infrastructure interventions, as far as possible on one or two facilities in the catchment area that have nationally renowned clinical expertise.

To create connections between research and practical health applications (translational research and personalised preventive medicine).

To help strengthen the research carried out by Fondazione IIGM and reap value from it, thanks in part to collaboration with top scientific institutions (e.g. Human Technopole).

To promote the implementation of the chronic disease management plan, which is a new care model - facilitated by digital transformation - based on increased recourse to home care, the creation of care networks, the operational reorganisation of hospitals and clusters and the formulation of personalised care plans, within the framework of the agreement with Piedmont Regional Council.

To support actions aimed at promoting healthy lifestyles. To focus on primary and secondary prevention, physical activity, sport and healthy diets, geared towards sustainable use of natural capital.

SDGs covered

The aim of the experimental Hospedal initiative is to promote collaboration between public and private actors focused on upgrading hospital departments by means of projects carried out by third-sector bodies providing support functions to hospitals run by health trusts in the Piedmont Region. The 2021 edition focused specifically on women's and children's health.

Value of allocation  
€1,575,000

### Telemedicina

The Telemedicina project on enhancing care quality to enhance patients' life quality aims to road-test the use of remote health monitoring as a tool for improving communication between hospitals and communities, and extending the home care model to chronic patients, including cancer patients. The project uses a customised technology platform and includes training and awareness-raising for operators.

Value of allocation  
€900,000

### So Far So Near

The So Far So Near project involving nationwide extension of the visual rehabilitation services for the developmental age provided by Istituto Chiossone in Genoa offers a range of visual rehabilitation services for under-18s through a combination of face-to-face and remote consultations, on the basis of the hub & spoke model, to give patients all over Italy access to the services they need. The project involves various rehabilitation centres and the creation of a dedicated IT portal.

Value of allocation  
€90,000

### Support for the vaccination campaign: Fondazione Compagnia di San Paolo Vaccination Hub

Inaugurated on 21 May 2021, the Fondazione Compagnia di San Paolo Vaccination Hub at 112/A Via Gorizia, built in partnership the City of Turin Local Health Authority, testifies to our Foundation's vigorous support for the Covid-19 vaccination campaign. The intervention increased the vaccination lines from three to 10, thus enabling the centre to keep working seven days a week from 8.00am to 8.00pm. As well as being open to the public, the hub became a reference point for the third sector, especially in the cultural field. The increase in capacity made it possible to vaccinate more people in less time (around 85,000 people were vaccinated up to 31 December, with an average of around 600 doses administered per day during the summer), thereby promoting the Common Good and putting people first - our most pressing priorities during the pandemic. Since 2020, we tackled the Covid-19 health emergency by working swiftly on the needs highlighted by local health facilities, so as to lay the foundations for better access to healthcare for everyone after the pandemic. This was the rationale for setting up the vaccination hub, in line with the strategic objective of enhancing prevention as a means of boosting life-long health and the sustainability of the health system.

In order to maximise efficiency by combining Compagnia's resources with those of the regional health service, a paediatric vaccination hub was opened next-door to the adult hub on 16 December 2021, as soon authorisation was given to vaccinate children aged 5-11. Thanks to Compagnia's support, it was possible to administer vaccinations from Monday to Friday, 5.00pm to 8.00pm, and throughout the day on Saturdays and Sundays, so as not to get in the way of children's school, sporting and leisure commitments. The interior of the vaccination centre was designed around children, and every step in the vaccination process was accompanied by games, entertainment and storytelling to alleviate children's anxiety about the jab.

Value of allocation  
€1,000,000

### Lead auxiliary body: Fondazione IIGM

Fondazione IIGM (Italian Institute for Genomic Medicine) continued the process of integration with the Istituto di Candiolo - IRCCS, a specialist cancer research and treatment centre belonging to the Piedmont-Valle d'Aosta Oncology Network. Genomic research linked with translational, personalised and regenerative medicine has established IIGM's reputation as a research body and innovation platform and demonstrated its ability to serve as a centre for the research work of the Città della Salute in Turin, including as a host institution, i.e. a centre capable of attracting research groups with funding (European groups in particular) because it provides an ideal scientific, technological and working environment. It has remained a focal point for the Planet Goal in biomedical research relating to oncology, in line with the Mission Cancer guidelines set down under the Horizon Europe framework programme.

Value of allocation  
€3,100,000

# 13.

## Fostering International Opportunities Mission

### The building-blocks of the Mission's strategy

Promoting the impact of initiatives on the strengthening of local system actors involved in Compagnia's network of international partners.

Improving the quality and increasing the number of people involved, by supporting diversity of gender and age in the bodies and initiatives supported.

Raising the quality of scientific production, monitoring its dissemination in the academic and institutional world and its impact on public opinion and decision-makers.

Promoting international training and capacity-building initiatives, thus providing young people at the start of their careers with opportunities for participation.

Helping boost and diversify revenue streams, thereby supporting the gradual economic independence of the beneficiary bodies and reducing their dependence on Compagnia.

#### SDGs covered

### Promoting cooperation and prosperity in the Mediterranean area

Valuing and leveraging strategic partnerships (IAI, ECFR, GMF): Med Strategy Group GMF, New Med IAI, Rome MED Dialogues ISPI, MENA Forum ECFR, Turkey Observatory CeSPI, the work of SRM.

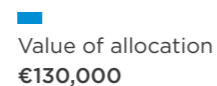

### Promoting and relaunching the process of European integration

Sharpening the focus of the research and outreach work of Fondazione Centro Studi sul Federalismo (CSF), of which Compagnia is a founder member.

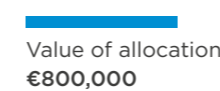

### Consolidating transatlantic relations

Valuing and leveraging strategic partnerships (IAI, ECFR, GMF): Transatlantic Security Symposium IAI, GMF Cities Programme.

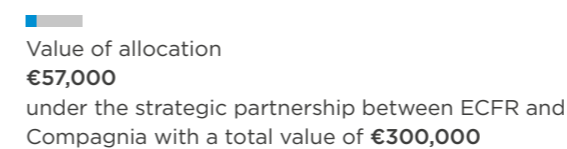

### Fostering new leadership in Turin and worldwide

Strengthening the training activities of the UN Hub in Turin (ITC ILO, UNSSC) and consolidation of international scholarship programmes (ECFR Pan European Fellowship, NATO Defense College Junior Fellowship).

### Fondazione Compagnia di San Paolo / ECFR Pan European Fellowship

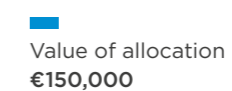

Under the strategic partnership between the two organisations, the European Council on Foreign Relations (ECFR) and Fondazione Compagnia di San Paolo have drawn up a Pan European Fellowship programme. Its aim is to support capacity building for the benefit of young researchers, in order to boost collaboration between the ECFR, one of Compagnia's strategic partners, and some of the bodies it works with at local and national level. The programme is aimed at young researchers and consists of training in various fields, including research & advocacy, network-building, event management, strategic communication and European policy, with a particular emphasis on foreign and security policy. Each fellowship lasts four months and is divided into two phases. The first is spent in one of the ECFR's European offices (in London, Paris, Berlin or Rome) and the second is spent at one of Fondazione Compagnia di San Paolo's partner institutions in Turin. Throughout the programme, under the supervision of ECFR experts and the host institution in Turin, fellows conduct a research project in a subject area such as the Middle East and North Africa, Turkey, the Western Balkans, migration, cyber security or European foreign policy on security and defence. The Turin-based host institutions involved in the Fellowship Programme in 2021 included Scuola di Applicazione dell'Esercito Italiano (part of the Italian army's officer training academy) and Fondazione Centro Studi sul Federalismo.

### T20

For the first time ever, Italy held the Presidency of the G20 in 2021. An international forum for the world's leading economies, the G20 bases its agenda on recommendations from civil society organisations from all over the world, structured into engagement groups. Think20 (T20), one of the groups recognised by the G20, is made up of think-tanks and research institutes from the 20 member states. T20 operates independently of national governments and makes policy proposals based on research and empirical evidence to support the G20 process and leaders. T20 thus facilitates interaction between the G20 and the international academic and research community, and helps raise awareness of global issues among a broader public.

Istituto Affari Internazionali (IAI), one of Compagnia's strategic partners, was appointed as a G20 scientific partner by the Presidency of Italy's Council of Ministers. The IAI was backed up by Istituto per gli Studi di Politica Internazionale (ISPI), of which Compagnia is a supporting member, in the Co-Presidency of the T20, also at the behest of the Presidency of Italy's Council of Ministers. Compagnia contributed directly to T20 in the form of grants of €75,000 to the IAI for the T20 Inception Conference and the coordination of the task forces, and €75,000 to ISPI for general T20 coordination. Compagnia also played a direct operational and scientific role in the proceedings, with staff members taking part in the work of T20, and its Chair, Francesco Profumo, chairing the T20 Task Force 7, dedicated to "Infrastructure Investment and Financing".

# 14.

## Protecting the Environment Mission

### The building-blocks of the Mission's strategy

To improve the condition of our natural capital, by recognising that the quality and functionality of natural systems are assets for local development and essential components of human health and well-being.

To support processes designed to accelerate the environmental and energy transition.

To encourage the spread of green innovation aimed at making food production and consumption healthier and more sustainable.

To raise awareness of climate change issues and support local efforts to build resilience to climate-change challenges.

### "Green Donors" call for proposals

The environmental crowdfunding campaigns triggered by the Green Donors call for proposals were completed in 2021. On completion of a training course for the participating bodies, to help formulate their goals and communication, 11 crowdfunding campaigns were launched, which collected donations from over 1200 people, thus attaining the specified targets and enabling the launch of 11 environmental sustainability projects in Piedmont and Liguria.

Value of allocation  
€200,000

### Sea TY

The retrieval of abandoned fishing nets from the Secche di Santo Stefano in the province of Imperia, under the Sea TY project (in conjunction with the Aworld app) and the Plogging World Championship - a combined running and litter collection race held in the municipalities of Val Pellice - are two events enabled by Fondazione Compagnia di San Paolo, which were not only intrinsically significant but also attracted a lot of media attention for educational purposes.

Value of allocation  
€45,900

### Dissemination events

Accademia dei Lincei, Festival Cinemambiente, Museo A come Ambiente and Legambiente Piemonte Valle d'Aosta all received support for their efforts to run annual events aimed at high-profile dissemination and mass participation in relation to culture and environmental awareness..

Value of allocation  
€145,000

### Platform F20

The Protecting the Environment Mission has forged international links by taking part, on behalf of Fondazione Compagnia di San Paolo, in the work of Platform F20, the international network of foundations committed to achieving the Sustainable Development Goals in G20 countries.

Value of allocation  
€20,000

### SDGs covered

## “Mutamenti” - Ideas and action for a changing climate

The call for proposals drawn up in conjunction with Fondazione CMCC - Centro Euro Mediterraneo sui Cambiamenti Climatici was issued in April 2021 with a view to increasing the resilience of Piedmont, Valle d'Aosta and the Ligurian hinterland to the impacts of climate change.

These areas need to equip themselves with tailored policies and instruments, develop new economic, social and environmental models to adapt to and withstand the long-term stresses caused by climate change, develop the necessary resilience and help communities prepare to respond effectively to the challenges posed by climate change.

The call targeted administrations in Piedmont, Valle d'Aosta and the Ligurian hinterland with populations of less than 20,000 people. Its aims were to enhance understanding of climate change (CC) and future climate scenarios, raise awareness of the impacts of CC on people, the environment and the economy, based on data and analysis; to inform people about the framework of global, European and national strategic policies on adaptation to CC and project funding opportunities arising from these policies; to support the selected areas in the design and implementation of local actions to adapt to climate change; and to support the design and subsequent implementation of specific CC-adaptation initiatives.

The call was divided into two phases and made use of a range of tools from Compagnia's operational tool-kit. Twelve areas were selected in the first phase, each of which received a grant of up to 20,000 euros to cover the cost of design and co-design. The winning candidates also benefited from individual and group training and project guidance, curated by Fondazione CMCC, with a view to providing the necessary data and other input for the detailed design of the proposed local adaptation initiatives. The winners were given climate data and scenarios in a simpler, more user-friendly format for distribution among local communities to raise awareness of the risks associated with climate change.

The second phase of the call for proposals, scheduled for the spring of 2022, will lead to the selection of the best and most effective proposals, which will be awarded grant funding to facilitate their practical implementation.

Value of allocation  
**€900,000**

## “Energia Inclusiva” - Innovators against energy poverty

Formulated by Compagnia di San Paolo's Protecting the Environment Mission and Boosting Innovation Mission in partnership with Fondazione SNAM was issued in February 2021 with a view to identifying, selecting, supporting and guiding innovative and environmentally friendly solutions to combat the rise in energy poverty.

This nationwide call for proposals benefited from technical support from the Polytechnic University of Turin's Incubator I3P, scientific support from Ashoka Italia and support from Fondazione Accenture as a digital partner.

The initiative is innovative for two reasons. Firstly, energy poverty is a growing problem that has attracted very little research or specific initiatives to counter it; and secondly, the collaboration between the two Foundations and their method represent a fresh, experimental departure that has enabled Compagnia to acquire new skills and establish connections and relationships outside its normal catchment area.

The call was divided into two phases. The first involved the selection of 13 proposals from six regions of Italy. Thanks to the Polytechnic University of Turin's Incubator I3P, these proposals received three months of tailored, specialist guidance and consulting to help refine their design and develop their potential.

The 13 proposals all involved different methods and approaches but shared a common commitment to addressing the issue of energy poverty by giving social innovators the task of seeking out green solutions - ideally with entrepreneurial potential - capable of generating broad, widespread change at system level.

On completion of the acceleration process, which provided eight hours of plenary training and 325 hours of one-to-one coaching, four projects were selected, which will be implemented in the coming months in Piedmont, Lombardy, Emilia-Romagna, Lazio and Sardinia. Each project received a grant of between 40,000 and 50,000 euros.

Value of allocation  
**€215,000**

## Part 4

# The cross-cutting functions.

Highlights of 2021.

## 4.

# The cross-cutting functions.

Highlights of 2021.

The work of the cross-cutting functions, which are organised into Departments and Offices, facilitate Fondazione Compagnia di San Paolo's overall operation and its institutional and grant-making activity in particular. They are repositories of skills and specialist knowledge, they work in concert with each other and with the Goals and Missions, they receive and manage special projects, including in relation to the Compagnia Group, and they represent an additional means by which Fondazione Compagnia di San Paolo can understand and meet the needs of its catchment area.

## 4.1 High-Impact Innovation Department

In 2021, the Impact Innovation Department (IID) channelled its efforts into the fields outlined in the MYPD 2021-24. These included finance for innovation, with an emphasis on ecosystem development by means of coordinated action with Fondazione Compagnia di San Paolo's Finance Department, and serving as a strategic, cross-cutting function for the Foundation and its Goals and Missions.

The first of these strands saw the completion of the second edition of the Techstars Smart Mobility Accelerator, an acceleration programme managed in partnership with Intesa Sanpaolo Innovation Center and Fondazione CRT. If we take the 23 start-ups from three continents accelerated in 2020 and 2021 as a unit of analysis, the aggregated data as at 31/12/2021 reveals some significant results: €26.5 million of VC funding collected in the post-programme phase, 183 jobs created, 19 PoC contracts with Italian clients, two start-ups have opened bases in Turin and a third has received guidance on opening an Italian branch. Open calls for proposals for two further initiatives designed to support the innovation ecosystem were launched in 2021, namely ESA BIC Turin, an incubation centre for the space economy, and Magic Spectrum, a digital acceleration programme focused on 5G and IoT technologies. Completing its ecosystem development work, the Department made a contribution on the technical and policy-making front to numerous entities co-governed by Fondazione Compagnia di San Paolo, either directly (Fondazione LINKS, LIFTT) or indirectly (ITHACA Associazione, ITHACA S.r.l., I3P and 2i3T). With regard to support for institutional activity in 2021, the IID continued to work on the management and exploitation of Compagnia's data assets. 2021 saw the definitive publication of the CSP Data Hub Gateway Web, an internal access portal developed over the past three years, which hosts Compagnia's information assets.

Compagnia's staff now have quick, intelligent access to the Foundation's historical grant-making data, which includes both approved and rejected applications. 30 dashboards are available for consultation and over 80% of staff are now using this innovative portal, for a total of almost 5,000 visits. To encourage use of the CSP Data Hub, Compagnia staff received over 60 hours of training. The related Mission

Dashboards project also reached completion, thus giving Compagnia staff access to a set of 15 dashboards fed with Open Data for effective interpretation of local needs: by hooking up with 50 open databases, the project generates 130 indicators, set out with a graphic design geared towards at-a-glance understanding. 2021 also saw the start of a major project for monitoring the Strategic Plan 2021-2024, which introduced ongoing reporting of the impact of Compagnia's initiatives on its catchment area. 700 impact indicators and over 60 data collection questionnaires were developed in preparation for the process. The CSP Data Hub initiative also included the Finance Department's advanced data management project, an internal service for data extraction, analysis and visualisation, and for disseminating the Foundation's experiences to the outside world by way of data philanthropy. The Department was also given the task of coordinating Compagnia Group's Data Science Task Force.

With regard to accelerating innovation, in 2021 the IID was tasked with conducting a feasibility study for the Next Generation We call for proposals. Next Generation We is a grant-making initiative launched in line with the Strategic Plan 2021-2024, designed to create the conditions for public administrative bodies in the catchment area to make best use of the opportunities made available by National Recovery and Resilience Plan. As this was an extraordinary call for proposals with a highly innovative purpose, the IID took on the task of analysing the context, designing the call and involving key institutional stakeholders.

The IID played a key role in project management for major, high-complexity projects in 2021, by supporting Turin's application to host the International Festival of Economics and then managing the preparation for the event. Considerable effort went into building relations with the local committee, coordinated by the Collegio Carlo Alberto, which encompasses a wide range of Turin-based players that provide financial and institutional support for the initiative.

# Building innovation ecosystems

A role recently taken on by Fondazione Compagnia di San Paolo, involving constant commitment on the part of the Impact Innovation Department

## SDGs covered

### The journey from lab to market

A strategy for cultivating a vibrant innovation ecosystem by means of a mix of patient capital, grant-making and multi-disciplinary expertise

200 start-ups supported in 2021

30+ initiatives put in place

50+ public and private partners involved

6 acceleration initiatives

### Accelerator platform

A "blended finance" instrument designed to put Turin on the European map of innovation ecosystems.

2 programmes under preparation

1 programme ready for launch

2 programmes at the open-call stage

1 programme already in place for several years

### Techstars Accelerator Programme

A pioneering programme and powerful magnet to attract high-potential start-ups to settle and grow in our catchment area.

A joint initiative by:

## Programme structure

4 editions ("classes") on the programme

€12m of investment from partners

12 early-stage start-ups selected per class

\$120K of investment received by each start-up

## Results

### Quality of accelerated start-ups

€26.5 m of funding in the post-programme phase

€6.6 m total revenues in FY 2021

183 jobs created in the wake of the programme

### Relations with the catchment area

19 PoC contracts with local clients

2 start-ups opened sites in Turin

1 start-ups guided through the opening of an Italian branch

### Access to human capital

150+ mentors supporting the programme

24 mentors selected by the Foundation

~1,500 meetings between mentors and start-ups (per year)

### Visibility for the Turin eco-system

5,000+ participants in the inaugural Demo Day

514 accredited investors among the participants

84% foreign accredited investors

\* Unit of analysis: 23 start-ups accelerated in the 2020 and 2021 editions, aggregated data as at 31/12/2021.

## 4.2 Planning, Research and Evaluation Department

In 2021, the department fulfilled its main functions in relation to the deployment of the MYPD 2021-2024, by helping design the architecture for monitoring the MYPD, coordinating the preparation of the 2022 Annual Planning Document (as well as the 2020 Annual Report), overseeing the advanced evaluation of Fondazione Compagnia di San Paolo's institutional activity, conducting three in-depth studies (birth-rate policies, European research on philanthropy and common goods), and providing analytical support to Compagnia's Goals, Missions and Governance.

While desk-based work remained relatively unaffected by the pandemic, certain study and research activities planned for 2021, such as the European Conference on "Philanthropy Research" and the Common Goods Research Project, suffered operational delays and were carried forward into 2022.

This process was accompanied by the publication of the weekly internal newsletter "Numeri & Filantropia", which focuses on the latest developments in philanthropy and the social sector, and has now reached over 500 editions.

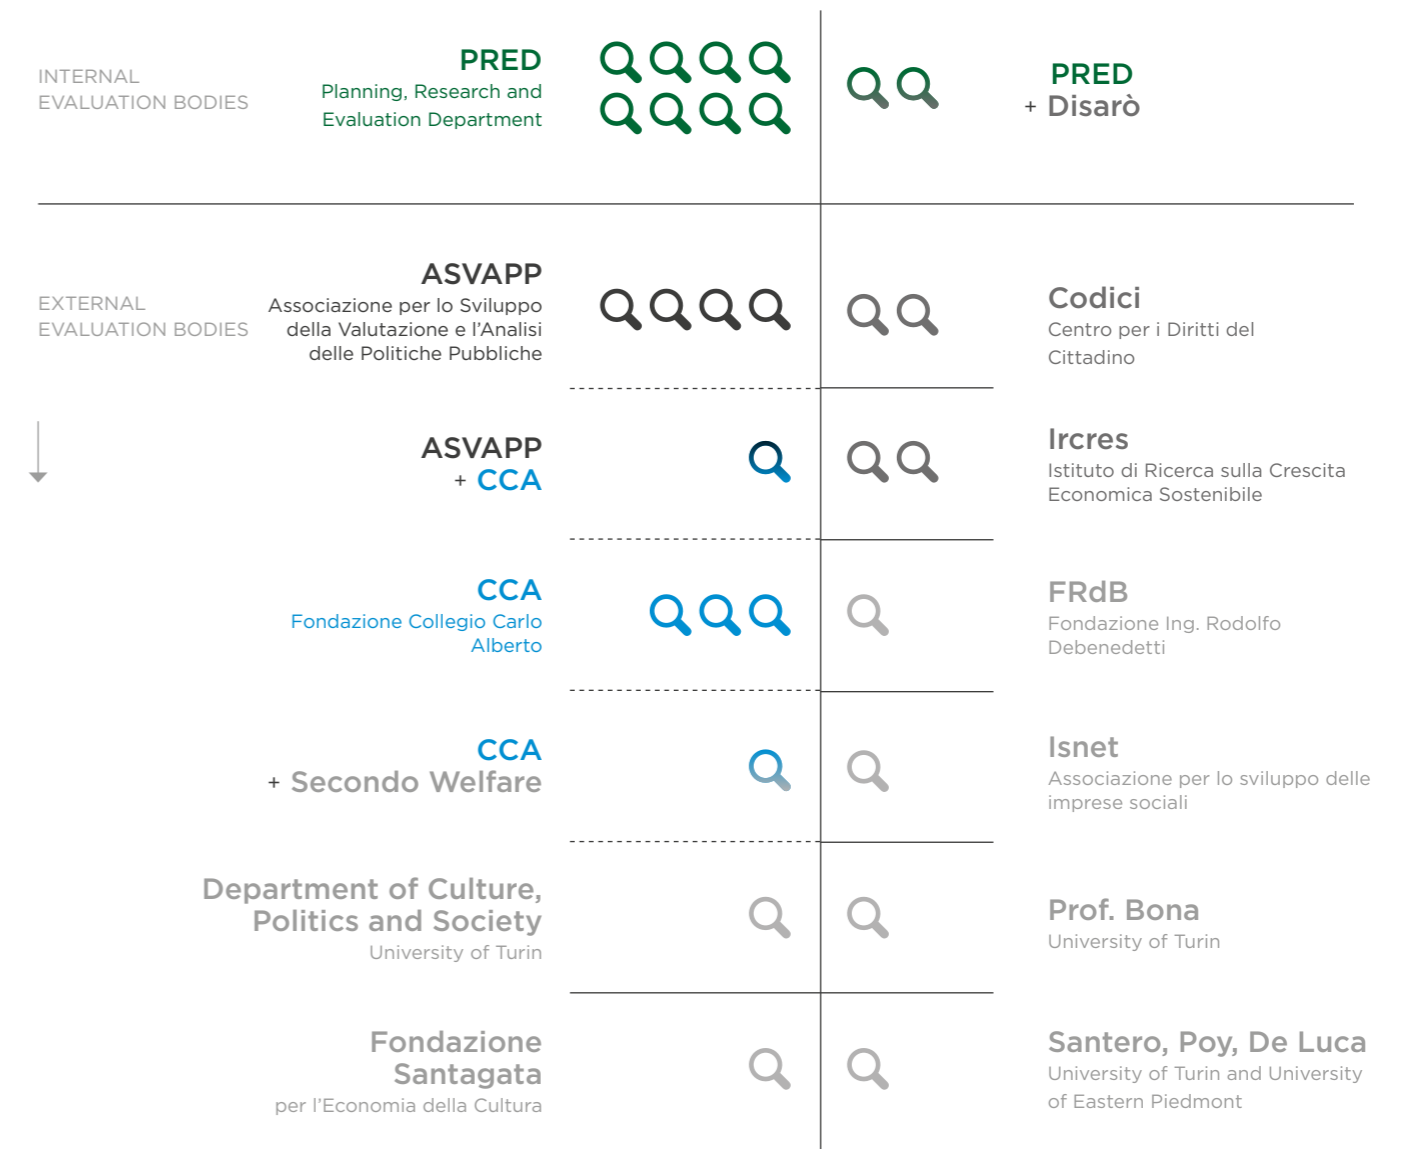

In pursuance of its evaluation role, the Department completed a number of complex operations, using a variety of analytical models. All the projects funded by Fondazione Compagnia di San Paolo are subject to rigorous progress monitoring by the relevant managers. The term "evaluation" refers to the in-depth analyses that describe and explain the processes involved in implementing projects and/or isolating their true impact on the situation and behaviours of beneficiaries.

The department is responsible for conducting various types of counterfactual analysis (in various ways), where useful and possible, as well as implementation analyses (spotlighting the positive and negative operating mechanisms of the projects) and advanced monitoring, which examine the quantifiable dimensions of projects and the degree of satisfaction of final beneficiaries.

The evidence that emerges from evaluations is summarised and systematically published in the Evaluation Library and can be consulted at <https://www.compagniadisanpaolo.it/it/biblioteca-valutazione/>. Where appropriate, the outcomes of evaluations have been written up in scientific articles and submitted to academic journals, to facilitate the circulation of the ideas and evidence concerned.

The evaluations in progress at the end of 2021 included 29 impact assessments (including 15 counterfactual) and 45 implementation analyses or advanced monitoring programmes. As shown in Figure 5.1, 19 evaluations have been assigned to external evaluators, 8 are being carried out internally by the Planning, Research and Evaluation Department, and 2 are being carried out by the Impact Innovation Department. A total sum of approximately €849,000 was allocated to external evaluations. This equates to 0.5% of total average annual funding disbursed by Fondazione Compagnia di San Paolo in the period 2016-2019.

FIGURE 4.1 BODIES APPOINTED TO CONDUCT EVALUATIONS

### 4.3 Operations Department

With the review of Fondazione Compagnia di San Paolo's organisational configuration and its alignment with the UN's Agenda 2030 for sustainable development, the Operations Department started work in 2021 on reinforcing, streamlining, sharing and enhancing the sustainability of all the processes and activities it undertakes in support of institutional action. Within the broader strategy set down in the MYPD 2021-24, it embraced the values of well-being, equity, equality – including gender equality – and sustainable organisational and production systems, with a view to constantly improving Compagnia's organisational quality.

On this basis, the Department channelled considerable effort in 2021 into defining the optimum alignment between Fondazione Compagnia di San Paolo's strategic goals and its operational tooling, in terms of processes and controls, by taking the action set out below.

The acquisition of a document management application made it possible to create workflows modelled on the Foundation's organisational processes. The Department thus enhanced the traceability of all documentation and facilitated the capitalisation of the knowledge generated and lessons learned. At the time of writing, improvements are still being made to the use of the document management application and studies are in progress to determine whether to extend it to processes and documents that the Foundation considers particularly sensitive.

A project designed to guide Compagnia towards obtaining ISO 9001 quality system certification by the late spring of 2022 got under way in the second half of 2021. This forms part of a broader effort that will also include obtaining Social Accountability certification (SA 8000), so as to equip the organisation with a management system that improves the effectiveness and efficiency of service delivery, increases the satisfaction of external and internal stakeholders and keeps Foundation's corpus of processes and procedures up-to-date and effective.

Agile working arrangements have been put in place by upgrading the IT infrastructure, enhancing the organisation of work and providing specific training on goals-based work methods.

Fondazione Compagnia di San Paolo has also set itself the goal of developing and implementing an in-house programme of cultural evolution on diversity and inclusion, so as to increase its alignment with Agenda 2030, the Sustainable Development

Goals and the role played by the Foundation as an agent of local development in support of equity and inclusion initiatives. Compagnia started offering training to teams and individuals in 2021 with a view to raising awareness of inclusion and diversity and involving organisers in delivering change. Staff took part in practical initiatives, the role of internal diversity and inclusion facilitator was created and work was done at the organisational level on context, rules and processes.

As part of the Diversity and Inclusion project, the Foundation took part, alongside other organisations, in a work group run by Fondazione SNAM in collaboration with Generazione Donna and Valore D, on care work and parenting, both of which play a major role in and have significant effects on both work and family life.

Compagnia also held discussions with its main software supplier on improving reporting processes and administrative monitoring procedures, in such a way as to make them less burdensome, without any loss of information or transparency. Closer collaboration with the institutional sector has been achieved in this area, with integrated actions for beneficiary bodies, providing them with more structured, effective and flexible development to help them respond promptly to the relevant challenges.

### 4.4 Communication

2021 marked the launch year of the MYPD 2021-24, which maps out the journey we intend to take over the next four years: "Compagnia di San Paolo for the common good since 1563. The choice for a sustainable future".

The goal that the Communications Department set itself was therefore to communicate the strategic role of Fondazione Compagnia di San Paolo in the local, national and international landscape, while explaining its continuities and innovations in relation to previous actions. The specific characteristics of this plan – a proactive approach, engagement and exchange with stakeholder communities, strategic communication – prompted a review of the way the Communication sector operates, which has now been completed.

Our alignment with the United Nations' Agenda 2030, the European Next Generation EU Plan and Italy's National Recovery and Resilience Plan has given us a responsibility to communicate effectively. Promoting cultural change and an integrated vision of sustainable development, while making certain topics on the European and Italian Agenda comprehensible, were the leitmotifs of our strategic action in addition to our everyday work on projects.

Using a combination of traditional communication tools and innovative media and languages, we have sent out the message that Compagnia has 500 years of history behind it but is changing pace and aligning with national and international recovery plans. By retaining two levels of planning – a strategic level, aimed at communication goals, and an operational level, focused on communication actions – we have been able to use the plan to guide our communication work, in terms of both perspective and everyday practice.

We have also set ourselves a social-media strategy. In terms of content, each subject has been covered using a specific tone of communication on the different communication channels, according to general, shared criteria. We have identified key concepts for each Mission, to help guide our storytelling and position the Foundation on the basis of the issues addressed in the Strategic Plan.

Obviously everyone made efforts in 2021 to align their communication with the ongoing pandemic crisis. We took two distinct approaches on this front, in accordance with the guidelines issued by top management. The first involved short-term action focusing on Compagnia's emergency responses, which remained in place in the recovery phase. The second took a medium-term perspective, emphasising Compagnia's system-oriented initiatives and its role as an agent of development, skilled in "unleashing the potential of organised civil society" with which we work, and collaborating with local public bodies according to a systemic approach and the principle of subsidiarity. The Communication Department's work in 2021 also involved a major campaign to align FCSP's auxiliary bodies, both at brand level and in terms of coordination, so as to strengthen people's perception of them as members of an integrated "Group".

We have inaugurated a Newsletter to the outside world as a means of increasing the lead collection base and raising awareness of Compagnia among a wider and yet qualified audience.

In terms of internal communication, we continued our #mentreestoacasa column (designed to foster a "professional community" and offer training for people working from home), we designed and delivered webinars of use to the Goals, Missions and Departments in conjunction with all the colleagues involved, and facilitated connection and synergy between the Goals and auxiliary bodies.

### PHaaS - Compagnia as a philanthropic intermediary: first results

The various tools of innovation in the tool-kit presented in the MYPD 2021-24 include Fondazione Compagnia di San Paolo's role as a philanthropic intermediary. This type of function consists in setting up a technical structure to help private donors put their philanthropic intentions into practice by minimising the bureaucratic and administrative commitments that these choices entail. Even giving is not always straightforward, and not everyone is prepared to build legal entities, such as foundations, to systematically translate their generosity into action and ensure its longevity. Fondazione Compagnia di San Paolo's embrace of Philanthropy as a Service (PHaaS) turns the organisation into an open philanthropic platform. Just as it used to be in the early years following its formation in 1563, Compagnia is at the service - free of charge - of philanthropists who want to establish projects for the common good.

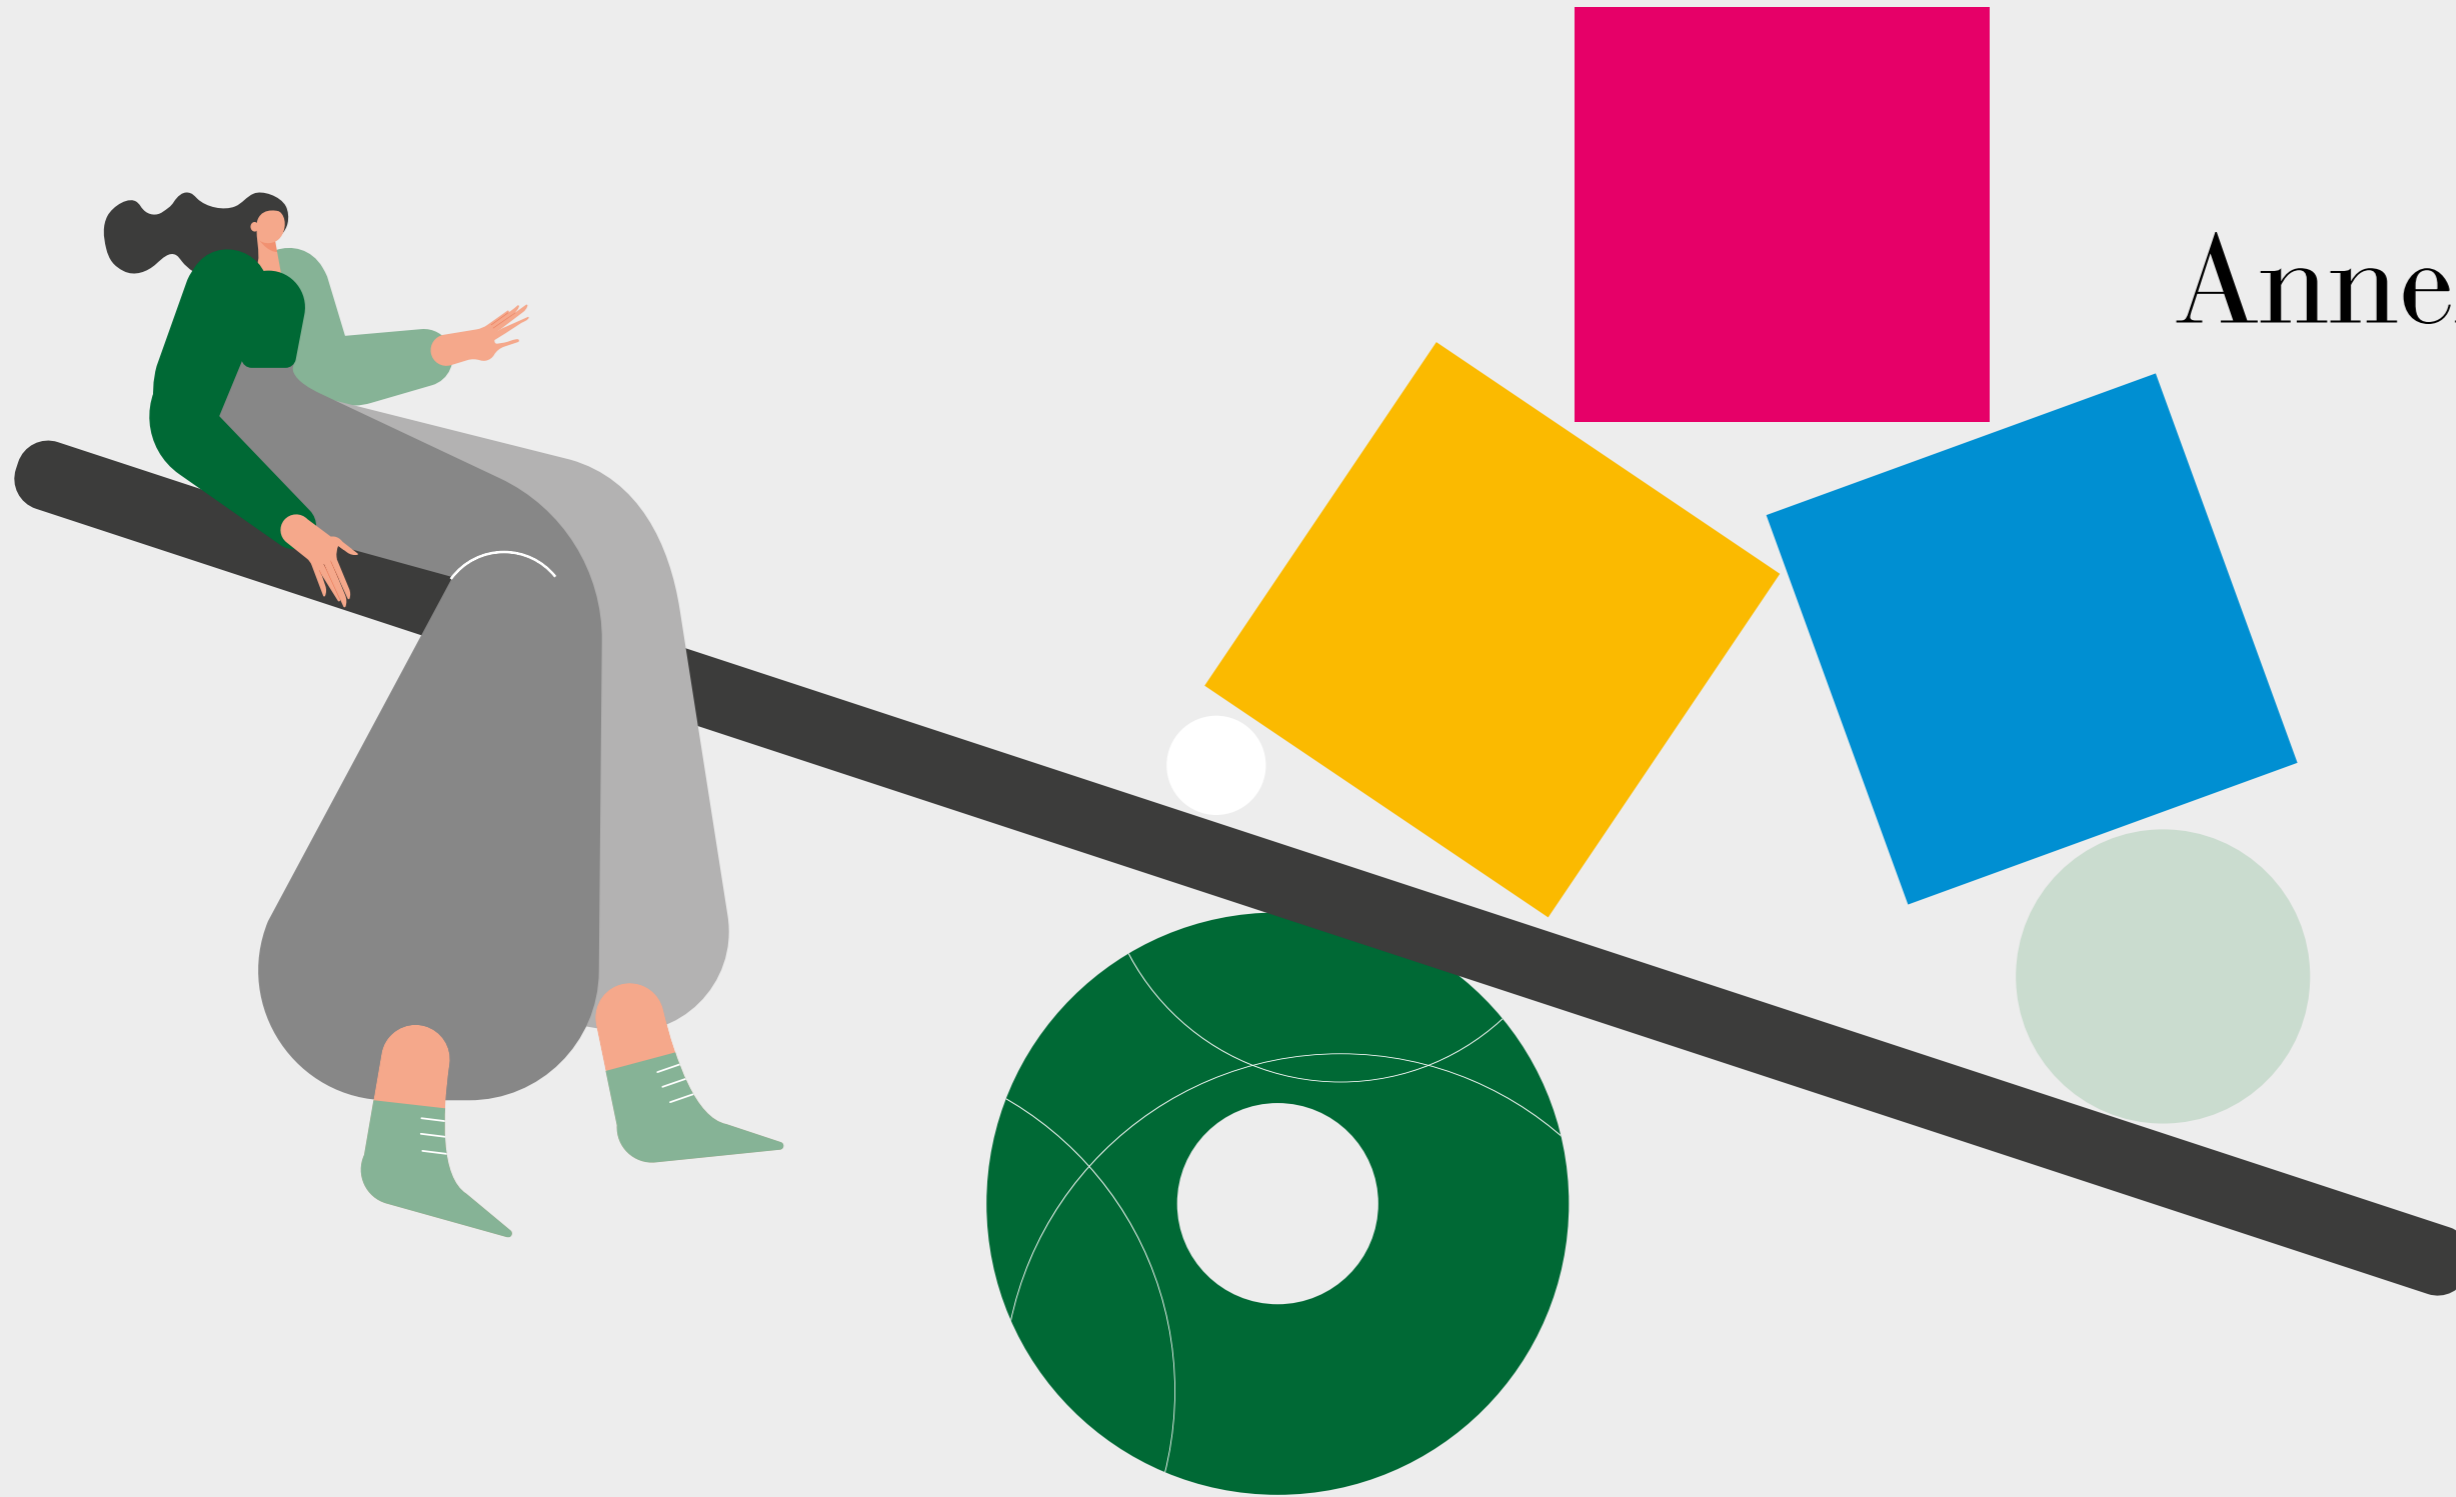

In recent years too, Fondazione Compagnia di San Paolo has earned the trust of people who have donated substantial sums to it in order to achieve philanthropic purposes consistent with its sensitivity and vision of the world. In 2021, Compagnia gave this work a definitive but deliberately flexible structure, by setting up Philanthropic Funds that draw upon the expertise and efforts of Compagnia di San Paolo's staff to carry out projects close to donors' hearts, while adopting a shared communication policy with the person or family who set up the fund. Interestingly, donors tended to choose types of projects that Compagnia has already undertaken, and on which it therefore had considerable know-how to offer.

Over its two-year trial and officialisation period, the PHaaS project collected some 4 million euros to fund initiatives in Piedmont (VCO + Val della Torre), Valle d'Aosta (Aosta), Lombardia (Pavia) and Senegal. One representative example? A new "Spazio 0-6" will open in Pavia in February, dedicated to early-years education for all, financed entirely by a private donor and implemented by Compagnia Group's specialist staff.

## Annexes

### 1. Key to typical financial statement captions

2. Performance indicators
3. Information about derivatives
4. Breakdown of the Balance Sheet and Income Statement
5. Comparative analysis
6. Calculation of the quota payable to the Voluntary Work Fund
7. Statement of changes in the Voluntary Work Fund
8. Statement of changes in net assets
9. Statements of legacies and onerous donations

On the basis of the guidance provided by the Presidency Committee of ACRI on 12 September 2012, the Financial Reporting and Tax Affairs Committee drew up a glossary of special financial statement captions at its meeting on 7 November 2012, with a view to identifying consistent criteria for setting out the financial statement captions in the Notes to the Financial Statements so as to make them easier to understand.

The financial statements are therefore drawn up in accordance with article 9 of Italian legislative decree 153 of 17 May 1999, the requirements of the Italian civil code, as far as compatible, and the national accounting standards laid down by the Organismo Italiano di Contabilità (OIC).

As Supervisory Authority, the Italian Ministry of Finance and the Economy is responsible for regulating the procedures for preparing and evaluating the financial statements and the means of publishing them. Guidance on this is currently provided by the Measure of the Italian Ministry of the Treasury dated 19 April 2001, published in the Official Journal of the Republic of Italy No. 96 on 26 April of the same year.

As stated in the Notes to the Financial Statements, under Italian legislative decree 139/2015, with effect from 1 January 2016, major changes have been made to the statutory provisions set down in articles 2421 to 2435 of the Italian civil code, which also concern Foundations, as established in article 9, paragraph 2 of Legislative Decree 153/99.

In the wake of these legislative changes, the Organismo Italiano di Contabilità has also revised its national accounting standards. These changes were examined by the ACRI Financial Reporting and Tax Affairs Committee, taking account of the Measure of the Ministry of the Treasury, the financial statements and the economic plan dated 19 April 2001 and the ACRI/MEF Protocol of Understanding dated 22 April 2015, with a view to verifying its applicability to Foundations, in accordance with article 9, paragraph 2 of legislative decree 153/99, according to which the aforementioned statutory provisions are “observed as applicable”.

The MEF measure is deemed to be a special rule, which makes a positive interpretation of the “as applicable” criterion, bearing in mind that the same ministry cites it and requires its application for the preparation of financial statements when the annual decree on capital provisions is issued.

Having established this, the financial statements consist of:

- the Balance Sheet, which shows the assets and liabilities that constitute the Foundation’s net assets;
- the Income Statement, showing income earned and expenses incurred in the year, as well as the results of the valuation activity carried out, with the subsequent allocation of the net resources generated;
- the Cash Flow Statement, showing the effects of economic and financial factors on the Foundation’s liquidity and indebtedness, by reconstructing the flows of income and expenditure on the basis of movements in the financial statement captions over the course of the financial year, in order to highlight the contribution made by the typical areas of Foundation’s work (a) operating profit/loss for the year; b) institutional activity; c) investment and asset management;
- The Notes to the Financial Statements, which provide information about each caption in the financial statements.

The financial statements are accompanied by the Report on Operations, which contains the economic and financial report and the mission report.

As well as providing an overview of the Foundation’s economic situation, the economic and financial report provides information about financial management performance, the results achieved in the period and the investment strategy adopted, with particular reference to the time horizon, performance targets, portfolio composition and exposure to risk.

The mission report sets out the institutional work carried out by the Foundation, providing a range of information, including the resolutions passed during the year and the beneficiaries of the interventions.

The format of the income statement takes account of the peculiarities of Foundations as non-commercial entities dedicated to socially useful purposes.

It can be divided into two parts:

- the first provides a breakdown of the composition of the resources generated in the year, as measured by the surplus for the year;
- the second shows the shares of the surplus allocated to capital reserves and to the pursuit of constitutional objectives, in accordance with the applicable legal requirements.

The “Tax” caption in the income statement does not indicate the total amount of tax paid by the Foundation and does not therefore show the full tax burden because, under ministerial provisions, financial revenues subject to withholding tax and substitute tax (e.g. interest and profit/loss from asset management) must be accounted for after tax. The total amount of tax paid by the Foundation is shown in the Notes to the Financial Statements.

For ease of understanding, the contents of the typical main captions is set out below.

## BALANCE SHEET

<b>Net assets</b> <i>Endowment fund</i>	Shows the Foundation's endowments. It consists of the endowment fund accruing to the Foundation following the initial transfer of the banking company of the original Istituto Bancario San Paolo di Torino, plus the reserves set aside in the following years.
<b>Net assets</b> <i>Reserve arising from revaluations and capital gains</i>	Shows revaluations and capital gains arising from the sale of shares in the transferee bank after the initial transfer.
<b>Net assets</b> <i>Mandatory reserve</i>	This is funded annually with a share of the surplus for the year, for the purpose of safeguarding the value of assets. The mandatory share of the surplus to be allocated to the reserve is determined by the Supervisory Authority from one year to the next, and remains to date at 20% of the surplus.
<b>Net assets</b> <i>Asset replenishment reserve</i>	This is funded with a share of the surplus for the year, for the purpose (like the mandatory reserve) of safeguarding the value of assets. The share of the surplus to be allocated to the reserve is determined annually by the Supervisory Authority, and remains to date at a maximum of 15% of the surplus. This provision is optional.
<b>Funds for institutional activity</b> <i>Funds for grant-making in key sectors and other constitutional sectors</i>	These funds are for carrying out institutional activities. They are maintained with shares of the surplus for the year and are used to fund grant-making.
<b>Funds for institutional activity</b> <i>Grant stabilisation fund</i>	The grant stabilisation fund is maintained with a share of the surplus for the year, with a view to ensuring stable flows of resources for institutional purposes over a multi-year time horizon.
<b>Funds for institutional activity</b> <i>Other funds</i>	These funds receive provisions made in connection with investments in securities and real estate, channelled directly into the pursuit of institutional objectives.
<b>Funds for institutional activity</b> <i>Contributions from third parties for institutional purposes</i>	This item includes, for example, contributions received in support of institutional projects carried out by the Foundation in partnership with third-party institutional bodies, and resources arising from legacies and onerous donations.
<b>Funds for institutional activity</b> <i>Fund for grant-making falling within the scope of article 1, paragraph 47 of Italian law 178 of 2020</i>	This newly introduced caption (MEF letter dated 30 July 2021, prot. DT 67077) shows the sums relating to tax relief pursuant to article 1, paragraphs 44 to 47 of Law 178 of 2020, as a balancing entry to caption 13-bis of the income statement, for the purpose of pursuing institutional objectives.
<b>Grants awarded</b>	On the liabilities side of the balance sheet, the caption represents the amount of funding awarded by the Foundation's governing bodies that was not yet liquidated at the end of the financial year.
<b>Voluntary work fund</b>	This was established under article 15 of law 266 of 1991 for the purpose of funding Centri di Servizio per il Volontariato (service centres for voluntary organisations). The annual provision is one fifteenth of the surplus, net of the provision for the mandatory reserve and the minimum share to be allocated to key sectors.

## INCOME STATEMENT

<b>Surplus for the year</b>	Shows the amount of resources to be allocated to institutional activity and safeguarding the assets. It represents the difference between income and operating costs plus tax. The allocations established by the law are determined on the basis of the surplus.
<b>Grants awarded during the year</b>	This is the sum of grants awarded during the year on the basis of the current operating surplus during the same period. The caption does not show all institutional activity carried out by the Foundation, because it does not include grants awarded from resources allocated to Funds for institutional activity.
<b>Allocations to Funds for institutional activity</b>	These are funds for carrying out institutional activities and are maintained with shares of the surplus for the year.
<b>Remaining surplus</b>	The unallocated part of the surplus, carried forward to future years.

## CASH FLOW STATEMENT

<b>Cash generated (absorbed) by operations in the financial year</b>	This shows the amount of cash generated (or absorbed) by operations undertaken in the financial year by reconstructing flows based on movements during the year in financial statement captions relating to the surplus, allocations to funds and changes in operating debit and credits items.
<b>Cash absorbed (generated) by grant-making operations</b>	This shows the amount of cash absorbed by grant-making operations, by reconstructing payment flows relating to grants, funds for institutional activities and the voluntary work fund.
<b>Cash generated (absorbed) by changes in items</b>	Shows the amount of cash generated (or absorbed) by changes in asset items (fixed assets, current financial instruments and loan credits/debits).

## Annexes

1. Key to typical financial statement captions
- 2. Performance indicators**
3. Information about derivatives
4. Breakdown of the Balance Sheet and Income Statement
5. Comparative analysis
6. Calculation of the quota payable to the Voluntary Work Fund
7. Statement of changes in the Voluntary Work Fund
8. Statement of changes in net assets
9. Statements of legacies and onerous donations

Providing accurate information on operations is becoming increasingly important and topical in the world of Foundations, which have long seen the need to back up the information they provide about institutional activity with information about their performance.

In order to increase the availability of financial statement information, significant performance indicators identified by the ACRI Financial Reporting and Tax Affairs Committee have been annexed to the financial statements since financial year 2012. This helps show Foundations' results more clearly and consistently.

The indicators in question relate to the most significant areas of Foundations' performance and provide a concise overview, while also enabling comparisons to be made more easily by non-specialist readers than is possible with financial statement information, regardless of how clear it may be.

The indicators cover profitability, efficiency of management and the composition of investments.

The following values, around which the indicators have been developed, are believed to adequately represent the various situations of individual entities:

- **assets**, as an indicator of the total amount of permanently available assets;
- **total net income**, as an indicator of the value generated by the use of the available resources;
- **funding awarded**, as an indicator of the resources allocated to institutional activity.

As far as balance sheet figures are concerned, the proposed indicators are calculated on the basis of current values, determined according to the criteria set down herein, with reference to the reporting of financial assets in the Notes to the Financial Statements.

PERFORMANCE INDICATORS	2021	2020
<b>Profitability indicators</b>		
<b>Indicator 1</b> Total net income / Assets	4.06%	2.68%
<b>Indicator 2</b> Total net income / Total assets	3.62%	2.48%
<b>Indicator 3</b> Surplus for the year / Assets	3.39%	2.37%
<b>Efficiency indicators</b>		
<b>Indicator 1</b> Average operating costs / Average total net income	6.28%	6.24%
<b>Indicator 2</b> Average operating costs / Average funding awarded	8.41%	8.26%
<b>Indicator 3</b> Operating costs / Assets	0.21%	0.25%
<b>Indicators of institutional activity</b>		
<b>Indicator 1</b> Funding awarded / Assets	2.14%	2.37%
<b>Indicator 2</b> Grant stabilisation fund / funding awarded	2.02*	2.23*
<b>Investment composition indicator</b>		
<b>Indicator 1</b> Equity investments in the transferee bank / Total assets at year's end	32.39%	29.49%

\* Indicator not expressed as a percentage.

## Methods for calculating the performance indicators

### Profitability

$$\text{Indicator 1} = \frac{\text{Total net income}}{\text{Assets}}$$

The indicator provides a measure of the return on the average assets invested by the Foundation in the year, valued at current values.

**Note:** The income is net of the costs incurred by the Foundation for the management of investments, such as fees paid to the investment manager, fees for trading securities, interest payable (if related to the investment), and expenses incurred for own staff assigned directly to the management of investments (for Foundations that manage their financial portfolio themselves rather than outsourcing it).

$$\text{Indicator 2} = \frac{\text{Total net income}}{\text{Total assets}}$$

The indicator provides a measure of the return on the average total assets invested by the Foundation in the year, valued at current values.

**Note:** This indicator has a different denominator from the previous indicator. Total assets also take into account investments made with liability captions other than assets. These are mainly resources allocated to the performance of institutional activity and which are invested, pending their use, with a view to optimising financial resources.

$$\text{Indicator 3} = \frac{\text{Surplus for the year}}{\text{Assets}}$$

This indicator summarises the result of the Foundation's investment activity, net of charges and taxes, in relation to its assets.

**Note:** The surplus for the year is the difference between total net income and other costs incurred by the Foundation, including tax.

### Efficiency

$$\text{Indicator 1} = \frac{\text{Operating costs (average [t0; t-5])}}{\text{Total net income (average [t0; t-5])}}$$

The indicator represents the share of income absorbed by the Foundation's operating costs.

**Note:** Since income varies according to market performance, whereas operating costs are more stable, in order to make the ratio significant, it is preferable to calculate the indicator using average values, for both costs and income, for a significant multi-year time frame of 5 years.

$$\text{Indicator 2} = \frac{\text{Operating costs (average [t0; t-5])}}{\text{Funding awarded (average [t0; t-5])}}$$

This indicator measures the ratio of operating costs to the volume of institutional activity carried out, determined by the sums awarded.

**Note:** The ratio is calculated on the basis of the average values over 5 years, so that the variability of annual data does not affect its significance.

$$\text{Indicator 3} = \frac{\text{Operating costs}}{\text{Assets}}$$

This indicator measures the ratio of operating costs to assets, thus correlating them to the size of the Foundation. Its value is more stable than indicators 1 and 2 because it is not affected by the cyclical nature of market performance.

### Institutional activity

$$\text{Indicator 1} = \frac{\text{Funding awarded}}{\text{Assets}}$$

This indicator measures the economic intensity of institutional activity in relation to the Foundation's own resources.

$$\text{Indicator 2} = \frac{\text{Grant stabilisation fund}}{\text{Funding awarded}}$$

It provides an estimate of the Foundation's ability to keep its grant-making at the same level as in the reference year, in the hypothetical event of an absence of income.

### Composition of investments

$$\text{Indicator 1} = \frac{\text{Equity investments in the transferee bank}}{\text{Total assets at year's end}}$$

This indicator shows the ratio of investment in the transferee bank to total investments, both measured at current values.

### Comparison with the annual planning document 2021

In line with our customary policy, a comparison of the results for the year and the corresponding annual planning document is provided below.

#### ORDINARY INCOME

**+ 190.16 million euros**  
(+ 125.23%)

The comparison between the income statement for 2021 and the annual planning document shows a substantial increase, which is mainly attributable to the distribution of dividends by Intesa Sanpaolo S.p.A., which was not envisaged at the time of preparation of the planning document. In particular, the result takes account of the aforementioned distribution by Intesa (+ 205.1 million euros approximately), the profit on asset management (+ 37.5 million euros approximately), the lower distribution by the funds managed by Fondaco SGR S.p.A. (- 57.4 million euros approximately), the higher dividends received from equity investments in unlisted companies (+ 3 million euros approximately) and the increased "art bonus" tax credit shown under "Other income" (+ 2 million euros approximately).

#### ORDINARY EXPENSES

**- 0.8 million euros**  
(- 4.32%)

The final figures for 2021 showed a significant reduction in operating costs compared with the forecast costs (- 0.8 million euros approximately), due to costs attributable to governing bodies, asset management services, consultants and external contractors and depreciation. The total of these decreases (- 1.2 million euros approximately) is partly offset by the increase in payroll costs.

#### TAX

**+ 17.8 million euros**  
(+ 215.05%)

The tax burden is higher than estimated in the annual planning document, largely as a result of the distribution of dividends by Intesa Sanpaolo S.p.A.. The increase is mitigated, however, by the reduction of the taxable amount to 50% of the dividends received, with effect from 1 January 2021, as a result of provisions of the 2021 budget law (law 178 of 2020).

#### EXTRAORDINARY OPERATING PROFIT/LOSS

**+ 0.04 million euros**

The difference between the actual situation and the one envisaged in the annual planning document is mainly attributable:

- in terms of extraordinary charges, to differences in the "art bonus" credit and the regional production tax (IRAP) credit (from the pending advance under art. 24 of decree law 34/2020) for €84,742 and the removal of donated, scrapped or destroyed assets from the fixed asset register for a value of €10,158;
- in terms of extraordinary income, to the reversal of the unused part of the fund for unforeseen and extraordinary charges to align it with the audit carried out by the Italian tax authorities for financial year 2016, which was defined in March 2022 (€34,637); the reversal of the unused fund for voluntary redundancy costs (€14,018) and the reversal of the unused social security technical deficit fund (€92,330).

#### SURPLUS FOR THE YEAR

**+ 137.14 million euros**  
(+ 109.93%)

Due to the above differences - especially the differences in ordinary income - the final surplus for the year is significantly higher than forecast.

#### INSTITUTIONAL ACTIVITY

**- 9.7 million euros**  
(- 5.76%)

The sums allocated to institutional activity are slightly lower than forecast.

By adding the allocations made with resources from previous years (€11,875,769) and the tax credit from allocations to the National Fund to Combat Juvenile Educational Poverty (€11,796,213) to the baseline figure of €134,998,953, we obtain the amount of resources awarded by Compagnia for 2021, namely €158,670,935, as shown in the attached mission report.

With the shift from funding institutional activity with the surplus from the same year, to funding institutional activity with the surplus from the previous year (under the realisation principle), the funds for grant-making in key sectors and the grant stabilisation fund were used to cover grant-making directly.

(\*) Apart from the ones for Campania and Calabria, the allocations for 2003 and 2004 were assigned - as voluntary-sector contributions - to the endowment of Fondazione per il Sud (€11,626,883). (\*\*) The prudential provisions for 2000-2004 were allocated to Fondazione per il Sud (€29,395,555). (\*\*\*) The 2016 allocations were assigned to other special regional funds for the voluntary sector, as specified by ACRI, with a view to rebalancing the geographical distribution of annual provisions, as set out in the agreement of 23 June 2010, in view of the foreseeable reduction in provisions for the entire foundation system. With the repeal of the ministerial decree of 8/10/1997 by legislative decree 117/2017 (the third-sector code), provisions made as of financial year 2017 must be paid by 31 October of the year of approval of the Fondo Unico Nazionale.
